

Local Biz Cold Email Script Pack

PRINTMAXX | printmaxxer.gumroad.com

This product is for personal use only. Do not redistribute.

The Local Biz Cold Email Script Pack

10 industries. 30 emails. copy-paste ready. tested on 14,000+ sends.

How to use this pack

1. Pick your target industry below
2. Customize the {{VARIABLES}} in each email
3. Send email 1 on day 1
4. Send follow-up 1 on day 3 (if no reply)
5. Send follow-up 2 on day 7 (if still no reply)
6. After 3 emails with no reply, move to next prospect

Sending limits: 10-15 emails/day per inbox for the first 2 weeks. After warmup: 50-80/day per inbox. Want 500/day? Use 7 inboxes.

The golden rule: 58% of replies come from email 1. If your first email doesn't work, more follow-ups won't fix it. Spend your optimization time on email 1.

INDUSTRY 1: DENTAL PRACTICES

Email 1 (Day 1)

Subject: patient no-shows costing you \$15K-50K/year

```
{{FIRST_NAME}},

we build patient apps for dental practices.

automated reminders. one-tap reschedule. 68% reduction in no-shows.

{{PRACTICE_NAME}} in {{CITY}} was losing ~$23K/year to no-shows. we built them an app.
6 months later: 11% no-show rate dropped to 4%.

saved $18K year one. app cost $8K. ROI positive in 5 months.

for {{PRACTICE_NAME}}:
- patient portal (appointment booking, reminders, forms)
- automated SMS 24h + 2h before appointment
- one-tap reschedule (keeps the slot filled)
- insurance card upload (faster check-in)

we've done 14 of these. average no-show reduction: 68%.
```

15-min call to see if this makes sense: [calendly link]

[YOUR NAME]

[PHONE]

Follow-Up 1 (Day 3)

Subject: re: patient no-shows costing you \$15K-50K/year

{{FIRST_NAME}},

quick follow-up. not trying to fill your inbox.

the average dental practice loses \$23K-47K per year to no-shows. automated reminders cut that by 60-70%.

happy to send you a 2-minute Loom video showing exactly what this looks like for {{PRACTICE_NAME}}. no pitch, just the walkthrough.

worth it?

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: last note on {{PRACTICE_NAME}} no-shows

{{FIRST_NAME}},

last email on this. if the timing isn't right, no hard feelings.

one thing: we just published a free checklist -- "7 things reducing no-shows for dental practices in 2026."

here's the link: [LINK]

genuinely useful even if we never work together. might save your front desk team some headaches.

[YOUR NAME]

INDUSTRY 2: LAW FIRMS

Email 1 (Day 1)

Subject: your website is losing you \$50K+ in cases

{{FIRST_NAME}},

we build websites for law firms that convert 12-18% of visitors into consultations.

most law firm sites convert 2-4%.

built a site for {{COMPETITOR_FIRM}} in {{CITY}}. before: 3% conversion.
after: 14%. generated 47 extra consultations in 6 months.

at {{LAW_FIRM}}'s estimated \$3K average case value = \$141K in new revenue.

site cost: \$9K. ROI: 15.6x.

what we do:

- website redesign (modern, mobile-first, under 2-second load)
- intake automation (forms to CRM to automatic follow-up)
- SEO for "{{CITY}} + {{PRACTICE_AREA}}"
- 7-email lead nurture for prospects who don't book immediately

done this for 22 law firms. average conversion increase: 3.2x.

15-min call: [calendly link]

[YOUR NAME]

[PHONE]

Follow-Up 1 (Day 3)

Subject: re: {{LAW_FIRM}} website

{{FIRST_NAME}},

ran a quick audit of {{LAW_FIRM}}'s website. found 3 things:

1. mobile load time: {{X}} seconds (should be under 2)
2. no click-to-call button on mobile (40%+ of legal searches are mobile)
3. intake form has {{X}} fields (data shows 3-4 fields converts 2x better than 7+)

happy to send you the full audit. takes me 5 minutes and it's useful regardless.

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: one last thing about {{LAW_FIRM}}

{{FIRST_NAME}},

last note. noticed {{LAW_FIRM}} isn't ranking for "{{PRACTICE_AREA}} lawyer {{CITY}}" on page 1.

that keyword gets ~{{X}} searches per month. at a 14% site conversion rate, that's {{X}} consultations per month you're missing.

if you ever want to chat about it, door's open: [calendly link]

no pressure either way.

[YOUR NAME]

INDUSTRY 3: RESTAURANTS

Email 1 (Day 1)

Subject: {{RESTAURANT_NAME}} losing orders to doordash?

{{FIRST_NAME}},

doordash and ubereats take 15-30% of every order.

on a \$40 order, you're giving up \$6-\$12 to the platform.

we build direct ordering systems for restaurants. your website. your margins.

{{RESTAURANT_NAME_2}} in {{CITY}} switched to direct ordering last quarter. saved \$4,200/month in platform fees.

cost: \$1,500 one-time setup + \$100/month. pays for itself in 10 days.

plus we optimize your google listing so you rank for "{{CUISINE}} near me" and "best {{CUISINE}} {{CITY}}."

interested? reply or call me: [PHONE]

[YOUR NAME]

Follow-Up 1 (Day 3)

Subject: re: direct ordering for {{RESTAURANT_NAME}}

{{FIRST_NAME}},

quick math for {{RESTAURANT_NAME}}:

if you're doing \$15K/month through delivery apps at 25% commission, that's \$3,750/month going to doordash/ubereats.

a direct ordering system captures that. \$3,750 back in your pocket minus \$100/month for the system.

\$3,650/month in savings. \$43,800/year.

worth a 10-minute call?

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: one more thing about {{RESTAURANT_NAME}}

{{FIRST_NAME}},

checked {{RESTAURANT_NAME}}'s google business profile.

{{X}} reviews averaging {{X}} stars. solid.

but your profile is missing: menu photos, updated hours for holidays, and a direct link to online ordering.

those 3 things alone can increase orders 15-20% from google searches.

happy to show you how to fix them in 10 minutes. free.

[YOUR NAME]

INDUSTRY 4: PLUMBING / HVAC

Email 1 (Day 1)

Subject: {{COMPANY_NAME}} losing jobs to companies with better websites

{{FIRST_NAME}},

when someone's AC breaks at 2 AM, they google "HVAC repair near me" and call the first company with a website that loads fast and has a phone number visible.

checked {{COMPANY_NAME}}'s site. page load: {{X}} seconds. phone number isn't visible above the fold on mobile.

we build websites for HVAC and plumbing companies that convert emergency searches into calls.

{{COMPANY_NAME_2}} in {{CITY}}: went from 8 calls/week from their site to 23 calls/week after redesign. took 2 weeks.

cost: \$1,200. ROI: positive in the first month.

what we build:

- fast loading site (under 2 seconds)
- click-to-call on every page
- google business profile optimization
- review management system
- emergency service landing page

15-min call: [calendly link]

[YOUR NAME]

[PHONE]

Follow-Up 1 (Day 3)

Subject: re: {{COMPANY_NAME}} website

{{FIRST_NAME}},

one quick thing. searched "{{SERVICE}}" near {{CITY}}" on google.

{{COMPANY_NAME}} showed up on page {{X}}. your top 3 competitors are all on page 1 with modern sites and 50+ reviews.

customers call whoever shows up first. right now, that's not you.

want me to show you what they're doing differently? takes 5 minutes.

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: {{COMPANY_NAME}} -- free google listing check

{{FIRST_NAME}},

I put together a free google business profile audit for {{COMPANY_NAME}}.

found 4 things you can fix today without paying anyone:

1. [category optimization]
2. [service area settings]
3. [photo updates]
4. [review response]

want me to send the full audit? no strings.

[YOUR NAME]

INDUSTRY 5: REAL ESTATE AGENTS

Email 1 (Day 1)

Subject: you're losing 40% of your leads to follow-up gaps

{{FIRST_NAME}},

we set up CRM and automation for real estate agents.

automatic follow-up sequences. lead scoring. SMS + email nurture.

{{AGENT_NAME}} in {{CITY}} was following up manually. converting 8%.

we set up the system. 6 months later: 22% conversion.

went from 18 closings/year to 31. 13 extra deals x \$12K avg commission = \$156K additional GCI.

system cost: \$2,500 setup + \$200/mo. paid for itself in 18 days.

what we build:

- CRM setup (GoHighLevel or Follow Up Boss)
- automated lead nurture (7-touch sequence)
- SMS automation (instant response to Zillow/Realtor leads)
- lead scoring (focus on hot leads first)
- pipeline tracking (never lose a lead)

done this for 31 agents. average conversion increase: 2.1x.

15-min call: [calendly link]

[YOUR NAME]

[PHONE]

Follow-Up 1 (Day 3)

Subject: re: {{FIRST_NAME}} -- lead follow-up

{{FIRST_NAME}},

one stat that changes how agents think about follow-up:

78% of deals go to the agent who responds first. not the best agent. the fastest.

if a Zillow lead comes in at 9 PM and you reply at 8 AM, another agent already booked the showing.

automated SMS responds in under 60 seconds. 24/7.

that alone is worth the conversation.

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: {{FIRST_NAME}} -- last note

{{FIRST_NAME}},

not going to keep emailing. just want to leave you with this:

13 extra closings per year at your average commission = a lot of money to leave on the table.

the fix: automated follow-up that works while you're showing houses, sleeping, or on vacation.

if the timing is ever right: [calendly link]

[YOUR NAME]

INDUSTRY 6: FITNESS / GYMS

Email 1 (Day 1)

Subject: {{GYM_NAME}} -- member retention drops 34% after month 3

{{FIRST_NAME}},

most gyms lose 34% of new members between month 3 and month 6.

not because the gym is bad. because nobody checks in on them after the first week.

we build automated onboarding and retention systems for gyms.

{{GYM_NAME_2}} in {{CITY}}: retention improved 28% after implementing a 90-day automated member journey.

the system:

- welcome sequence (first 7 days, daily check-ins)
- milestone celebrations (first 10 visits, 30-day streak)
- at-risk alerts (member hasn't visited in 7+ days)
- re-engagement campaigns (automated "we miss you" with a free class offer)
- referral program automation

cost: \$2,000 setup + \$150/mo. one retained member at \$50/mo pays for the entire system.

15-min call: [calendly link]

[YOUR NAME]

[PHONE]

Follow-Up 1 (Day 3)

Subject: re: {{GYM_NAME}} retention

{{FIRST_NAME}},

quick math.

if {{GYM_NAME}} has 200 members at \$50/mo avg, and you're losing 34% between month 3-6, that's 68 members per year.

68 members x \$50/mo x 6 months of lost revenue = \$20,400/year walking out the door.

a \$150/mo retention system that saves even 20% of those members = \$4,080 back.

worth 15 minutes to explore?

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: {{GYM_NAME}} -- free retention audit

{{FIRST_NAME}},

put together a quick retention audit for {{GYM_NAME}} based on what I can see publicly:

- google reviews mention: [specific pattern you noticed]
- class schedule: [observation about timing/variety]
- website: [specific issue]

3 free recommendations inside. happy to share even if we never work together.

want me to send it?

[YOUR NAME]

INDUSTRY 7: SALONS / SPAS

Email 1 (Day 1)

Subject: {{SALON_NAME}} -- 60% of clients don't rebook before leaving

{{FIRST_NAME}},

industry data: 60% of salon clients leave without rebooking their next appointment.

of those, 35% never come back.

we build automated rebooking and retention systems for salons.

{{SALON_NAME_2}} in {{CITY}} went from 42% rebooking rate to 71% with automated reminders, loyalty rewards, and a "book your next visit" SMS sent 2 hours after every appointment.

the result: \$3,800/month in additional revenue from clients who would have ghosted.

cost: \$1,800 setup + \$100/mo.

what we build:

- automated rebooking SMS (sent post-appointment)
- loyalty program (visit tracking + rewards)
- birthday/anniversary automated offers
- no-show follow-up sequence
- review request automation

15-min call: [calendly link]

[YOUR NAME]

[PHONE]

Follow-Up 1 (Day 3)

Subject: re: {{SALON_NAME}} rebooking

{{FIRST_NAME}},

one tactic that works immediately:

send an SMS 2 hours after every appointment: "thanks for visiting {{SALON_NAME}} today. ready to book your next appointment? tap here: [booking link]"

salons that do this see 20-30% of clients rebook same day.

we automate this. takes 15 minutes to set up. runs forever.

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: {{SALON_NAME}} -- your google reviews

{{FIRST_NAME}},

{{SALON_NAME}} has {{X}} google reviews. solid.

but I noticed most are from 6+ months ago. google's algorithm favors recent reviews.

we can set up an automated review request that goes out after every appointment. clients tap one button to leave a review.

salons using this get 8-15 new reviews per month on autopilot.

want to try it? first month free.

[YOUR NAME]

INDUSTRY 8: AUTO REPAIR

Email 1 (Day 1)

Subject: {{SHOP_NAME}} -- your competitors are sending service reminders

{{FIRST_NAME}},

dealerships send automated service reminders. independent shops don't.

that's why customers drift back to the dealer for their oil change even though you're \$40 cheaper.

we build customer retention systems for auto repair shops.

{{SHOP_NAME_2}} in {{CITY}} started automated service reminders 6 months ago.
result: repeat visits increased 34%. revenue up \$5,200/month.

what we set up:

- automated service reminders (oil change, tire rotation, inspection)
- digital vehicle history (customers see all past work in one place)
- review request after every visit
- seasonal maintenance campaigns (winter prep, AC check)
- referral rewards

cost: \$1,500 setup + \$100/mo. one extra customer per week covers the entire system.

15-min call: [calendly link]

[YOUR NAME]

[PHONE]

Follow-Up 1 (Day 3)

Subject: re: service reminders for {{SHOP_NAME}}

{{FIRST_NAME}},

the average auto repair customer is worth \$600-900/year in recurring maintenance.

if automated reminders bring back just 5 extra customers per month, that's \$3,000-4,500/month in additional revenue.

system cost: \$100/month.

that's a 30-45x return.

worth a quick call?

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: {{SHOP_NAME}} -- quick google check

{{FIRST_NAME}},

searched "auto repair near {{CITY}}" and "mechanic {{CITY}}."

{{SHOP_NAME}} is on page {{X}}. top 3 results all have 100+ google reviews and updated websites.

two things you can do today:

1. ask your next 5 customers to leave a google review (most will say yes if you ask in person)
2. add your hours and service list to google business profile

free advice. no catch.

[YOUR NAME]

INDUSTRY 9: ACCOUNTING / TAX PREP

Email 1 (Day 1)

Subject: {{FIRM_NAME}} -- client acquisition cost vs lifetime value

{{FIRST_NAME}},

the average accounting firm spends \$300-500 to acquire a client who pays \$3,000-8,000/year for 5+ years.

that's an incredible ROI. the problem: most firms don't have a system to acquire clients beyond referrals.

we build client acquisition systems for accounting firms.

{{FIRM_NAME_2}} in {{CITY}}: added 23 new clients in 6 months using a combination of SEO, cold email, and automated nurture.

average client value: \$4,200/year. 23 clients x \$4,200 = \$96,600 in annual recurring revenue.

cost: \$3,000 setup + \$300/mo management.

what we build:

- website optimized for "{{CITY}} accountant/CPA/tax prep"
- automated lead nurture (7-email sequence for prospects)
- cold email campaigns targeting businesses in your area
- review generation system
- referral program automation

15-min call: [calendly link]

[YOUR NAME]

[PHONE]

Follow-Up 1 (Day 3)

Subject: re: {{FIRM_NAME}} client acquisition

{{FIRST_NAME}},

tax season is coming. businesses are searching for accountants right now.

"accountant {{CITY}}" and "CPA {{CITY}}" are getting {{X}} searches per month combined.

your website either captures those searches or your competitors do.

want me to run a quick SEO check on {{FIRM_NAME}}'s site? takes 5 minutes. free.

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: {{FIRM_NAME}} -- one last thought

{{FIRST_NAME}},

average accounting client stays 5-7 years. at \$4K/year, each new client is worth \$20K-28K in lifetime revenue.

even if a client acquisition system only adds 2 clients per month, that's \$480K-672K in lifetime value over a year.

if the timing is ever right: [calendly link]

appreciate your time either way.

[YOUR NAME]

INDUSTRY 10: GENERAL CONTRACTORS

Email 1 (Day 1)

Subject: {{COMPANY_NAME}} -- losing bids to contractors with better online presence?

{{FIRST_NAME}},

homeowners check 3 things before hiring a contractor:

1. google reviews (quantity + recency)
2. website (does it look professional or like it was built in 2012?)
3. portfolio (before/after photos of past work)

checked {{COMPANY_NAME}}'s online presence. a few things stood out.

we build websites and reputation systems for contractors.

{{COMPANY_NAME_2}} in {{CITY}}: redesigned their site and set up review automation.
result: leads from google increased 3x in 90 days.

went from 4-5 leads/week to 12-15.

what we build:

- modern website with project portfolio
- google business profile optimization
- automated review requests after every job
- lead capture (form + click-to-call)
- local SEO for "{{SERVICE}} {{CITY}}"

cost: \$1,500-2,500. pays for itself with 1 new job.

15-min call: [calendly link]

[YOUR NAME]

[PHONE]

Follow-Up 1 (Day 3)

Subject: re: {{COMPANY_NAME}} online presence

{{FIRST_NAME}},

quick observation: {{COMPANY_NAME}} has {{X}} google reviews.

your top competitor ({{COMPETITOR}}) has {{Y}}.

homeowners hire the contractor with the most reviews. it's that simple.

we can set up a system that gets you 10-20 new reviews per month on autopilot.

want to see how it works?

[YOUR NAME]

Follow-Up 2 (Day 7)

Subject: {{COMPANY_NAME}} -- free site audit

{{FIRST_NAME}},

ran a quick audit of {{COMPANY_NAME}}'s website:

- load time: {{X}} seconds (should be under 2)
- mobile experience: [observation]
- SEO: not ranking for "{{SERVICE}} {{CITY}}"
- missing: project portfolio with before/after photos

happy to send the full report. free. useful even if we never work together.

[YOUR NAME]

OBJECTION HANDLING SCRIPTS

Objection 1: "We already have a web person"

totally get it. not trying to replace anyone.

quick question though: is your current setup generating inbound leads?

or is it more of a "we have a website because we're supposed to" situation?

if it's driving leads, great. keep doing what works.

if not, might be worth a 10-minute conversation about what's changed in 2026.

no obligation either way.

Objection 2: "We don't have the budget"

makes sense. most small businesses are careful with spending.

two things to consider:

1. the system typically pays for itself within 30-60 days from new clients
2. we offer a payment plan: \$XXX upfront + \$XXX/month for 6 months

but if the timing genuinely isn't right, no pressure. happy to check back in 3 months.

Objection 3: "Send me more info"

sure. here's a 2-minute video walkthrough of what we'd build for {{COMPANY_NAME}}: [LOOM LINK]

and here's a case study from a similar business in your industry: [LINK]

after you watch, want to hop on a 10-minute call to see if it fits?

Objection 4: "How do I know this works?"

fair question. here are 3 ways:

1. case study: {{COMPANY}} went from {{BEFORE}} to {{AFTER}} in {{TIME}}
2. we offer a 30-day money-back guarantee on all setup work
3. happy to connect you with 2-3 past clients so you can ask them directly

the proof is in the results. which of those would be most useful?

Objection 5: "I need to think about it"

absolutely. no rush.

one thing that might help: I'll send you a free audit of your current setup so you can see exactly what we'd change and what the expected impact would be.

no obligation. just information so you can make a more informed decision.

I'll follow up in a week. sound good?

Objection 6: "We tried marketing before and it didn't work"

that's actually why a lot of our clients come to us.

the difference: we don't do "marketing." we build systems that generate leads automatically.

the typical agency approach (post on social, run ads, hope for the best) doesn't work for local businesses.

what works: showing up when someone in your area searches for your service.

that's SEO + reviews + a website that converts.

specific, measurable, and it either works or it doesn't.

want to see what it would look like for {{COMPANY_NAME}}?

Objection 7: "Your price is too high"

understand. let me reframe the cost:

if the system generates {{X}} new clients per month at your average job value of \${{Y}},
that's \${{Z}} in new revenue per month.

system cost: \${{COST}}/month.

ROI: {{Z/COST}}x per month.

the question isn't "can I afford this?" it's "can I afford NOT to have this generating leads while my competitors do?"

but if the budget genuinely doesn't work, I respect that. happy to revisit in a few months.

Objection 8: "I'm too busy right now"

that's actually the best time to set this up.

the system runs on autopilot after initial setup. you don't manage it.
leads come in. you close them. that's your only involvement.

setup takes 2 weeks. your time commitment: one 30-minute call + 15 minutes of feedback on the draft.

after that, it generates leads without you touching anything.

want to knock out that 30-minute call this week?

DNS SETUP QUICKSTART (15 Minutes)

Step 1: Buy 3 domains (\$12-15 each)

Go to Porkbun or Namecheap. Buy 3 domains:

- yourname-consulting.com
- yourname-dev.com

- yourname-agency.com

Never cold email from your primary domain.

Step 2: Add DNS records (per domain)

SPF:

```
Type: TXT
Host: @
Value: v=spf1 include:_spf.google.com ~all
```

DKIM: generate in your email tool (Instantly, DeliverOn, or Google Workspace). Add the provided key as a TXT record.

DMARC:

```
Type: TXT
Host: _dmarc
Value: v=DMARC1; p=none; rua=mailto:dmarc@yourdomain.com
```

Step 3: Create inboxes

2-3 inboxes per domain = 6-9 total inboxes.

Cheapest: Google Workspace at \$7/inbox/month

Fastest: DeliverOn at \$49/month (pre-warmed, skip warmup)

Step 4: Warmup (if not using pre-warmed)

- Days 1-7: send 10-15 emails/day to friends. Have them reply.
- Days 8-14: increase to 20-30/day. Mix in cold sends.
- Days 15-21: increase to 30-50/day. Begin cold outbound.
- Day 22+: full volume at 50-80/inbox/day.

Total setup time: 15 minutes for domains + DNS. Warmup runs in background for 2-3 weeks (or skip with pre-warmed inboxes).

QUICK REFERENCE

Industry	Email 1 Subject	Key Metric
Dental	patient no-shows costing you \$15K..	68% no-show reduction
Legal	your website is losing you \$50K+ ..	3.2x conversion increase
Restaurant	losing orders to doordash?	\$4,200/mo saved
Plumbing/HVAC	losing jobs to better websites	8 to 23 calls/week
Real Estate	losing 40% of leads to follow-up ..	2.1x conversion increase
Fitness	member retention drops 34% after ..	28% retention improvement

Salon/Spa	60% of clients don't rebook	42% to 71% rebooking
Auto Repair	competitors sending service remin..	34% more repeat visits
Accounting	client acquisition cost vs lifeti..	23 new clients in 6 months
Contractor	losing bids to better online pres..	3x leads in 90 days
