

The Prompt Vault: 200 Production Prompts for Solopreneurs

Product Overview

200 copy-paste prompts organized by business function. Not toy prompts. Not “write me a poem about leadership.” These are the exact prompts that run real businesses — content creation, outreach, coding, research, and strategy.

Every prompt has been tested against Claude 3.5 Sonnet, GPT-4o, and Claude 3 Opus. They work across all major LLMs, but they’re optimized for Claude.

Pricing

\$27 (one-time)

Target Audience

- Solopreneurs who use AI daily but get mediocre results
- Freelancers who spend 30 minutes writing a prompt that should take 30 seconds
- Founders who know AI can do more but don’t know how to ask
- Content creators who want consistent quality without hiring writers

What’s Inside

Section	Prompts	Use Case
1. Content Creation	40	Twitter threads, newsletters, blog posts, hooks, CTAs
2. Outreach	40	Cold emails, LinkedIn messages, DMs, follow-ups
3. Code & Building	40	App scaffolding, debugging, refactoring, API integration
4. Research	40	Market research, competitor analysis, trend spotting, alpha extraction
5. Business Strategy	40	Pricing, positioning, launch plans, growth levers

Format

- Each prompt is clearly labeled with its purpose
- Variables marked with [BRACKETS] for easy customization
- Expected output described so you know what to look for
- Ready to paste directly into any AI chat interface

Guarantee

Use 10 prompts in your first week. If they don't save you at least 5 hours, email for a full refund.

Section 1: Content Creation — 40 Production Prompts

Twitter / X Prompts (1-15)

Prompt 1: Viral Thread Opener

Write a Twitter thread hook about [TOPIC]. The first tweet must:

- Start with a bold, specific claim backed by a number
- Create an information gap (the reader MUST click to learn more)
- Be under 240 characters
- Not start with "I" or use words like "amazing," "incredible," or "game-changing"

Example energy: "I analyzed 1,247 landing pages that convert above 8%. They all break the same 3 'best practices.'"

Topic: [YOUR TOPIC]

Context: [WHO YOUR AUDIENCE IS AND WHAT THEY CARE ABOUT]

Prompt 2: Twitter Thread Body (10 Tweets)

Write a 10-tweet thread about [TOPIC]. Structure:

Tweet 1: Hook (already written – use this: "[PASTE YOUR HOOK]")
Tweet 2: Set the stakes – what the reader loses by not knowing this
Tweet 3–8: Core content – one actionable point per tweet, with specific examples, numbers, or tools
Tweet 9: Summary – the 3 key takeaways in bullet points
Tweet 10: CTA – ask a question or point to a resource

Rules:

- Every tweet under 280 characters
- No thread numbering (no "1/10" or "Thread:")
- No emoji except in the CTA tweet
- Each tweet must stand alone – if someone screenshots one tweet, it should still make sense
- Use line breaks for readability

Prompt 3: Engagement Bait (Value-First)

Write 5 standalone tweets about [TOPIC] designed to get replies. Each tweet must:

- Make a specific, slightly controversial claim
- End with a question that's genuinely interesting to answer
- Be under 200 characters
- NOT be ragebait – the controversy should be professional disagreement, not attacks

Format each as:

[TWEET TEXT]

Target replies: [what kind of replies this should generate]

Prompt 4: “How I Did X” Story Tweet

Write a Twitter story post about how I [ACHIEVED RESULT] in [TIMEFRAME].

Facts to include:

- [FACT 1]
- [FACT 2]
- [FACT 3]

Structure: Start with the result (end state), then walk backward through the 3–4 key decisions that got there. End with the one insight nobody talks about.

Tone: Conversational, specific, zero humblebragging. If it sounds like a LinkedIn post, rewrite it.

Prompt 5: Quote Tweet Response

I want to quote tweet this post: "[PASTE THE ORIGINAL TWEET]"

Write 3 quote tweet options:

1. Add a contrarian but respectful take
2. Add a specific data point or example that supports their point
3. Add a "here's what they're not telling you" angle

Each under 200 characters. The goal is to add value, not clout-chase.

Prompt 6: Twitter Bio Generator

Write 5 Twitter bio options for someone who:

- Does: [WHAT YOU DO]
- For: [WHO YOU SERVE]
- Key result: [YOUR BEST METRIC OR ACHIEVEMENT]

Rules:

- Under 160 characters each
- No "| Speaker | Author | Thought Leader" format
- Must include what someone gets by following you
- One should be funny/irreverent, one should be dead serious, rest in between

Prompt 7: Daily Tweet Calendar (7 Days)

Create a 7-day tweet calendar for a [NICHE] account.

Each day gets:

- 1 main tweet (value post, story, or insight)
- 1 engagement tweet (question, poll, or hot take)
- Suggested posting times (EST)

Mix the content types: Monday = insight, Tuesday = story, Wednesday = hot take, Thursday = how-to, Friday = resource share, Saturday = personal, Sunday = reflection.

My audience is [DESCRIBE AUDIENCE]. They care about [TOPICS].

Prompt 8: Thread from Blog Post

Convert this blog post into a Twitter thread of 8-12 tweets:

[PASTE BLOG POST OR KEY POINTS]

Rules:

- Hook tweet must work as a standalone viral tweet
- Cut all filler, qualifiers, and "it depends" language
- Each tweet = one concrete idea with a specific example
- End with a CTA to read the full post at [URL]
- Don't say "In this thread" – just start teaching

Prompt 9: Polarizing Take Framework

Write a tweet that takes a strong stance on [TOPIC].

The take: [YOUR ACTUAL OPINION]

Format options (pick the best fit):

A) "Unpopular opinion: [TAKE]. Here's why: [ONE SENTENCE REASON]"

B) "[THING EVERYONE DOES] is a waste of time. [ALTERNATIVE] works 3x better."
C) "Stop [COMMON ADVICE]. Start [CONTRARIAN ALTERNATIVE]. I tested both for [TIME PERIOD]."

The tweet must be defensible. Don't be wrong on purpose for engagement.

Prompt 10: Twitter Carousel Script

Write a 6-slide Twitter carousel about [TOPIC].

Slide 1 (Cover): Bold headline + subtitle that creates curiosity
Slide 2-5: One key point per slide with a supporting detail or mini case study
Slide 6: Summary + CTA (follow for more, grab the free resource, etc.)

Design notes:

- Each slide: max 40 words
- Use bullet points, not paragraphs
- Headline per slide: 5-8 words
- Color scheme suggestion: [BRAND COLORS or "suggest one"]

Prompt 11: Repurpose Replies into Posts

I had this exchange on Twitter:

Original tweet: "[ORIGINAL]"

My reply: "[MY REPLY]"

It got [NUMBER] likes.

Turn my reply into a standalone tweet or short thread that captures the same energy but doesn't need the original context. Add a hook and make it self-contained.

Prompt 12: Trend Newsjacking

This is trending right now: [TRENDING TOPIC OR NEWS]

My niche is [YOUR NICHE].

Write 3 tweets that connect this trending topic to my niche in a way that's:

1. Relevant (not forced)
2. Valuable (adds a new angle)
3. Timely (would only work this week)

If the trending topic doesn't naturally connect to my niche, say so instead of forcing it.

Prompt 13: Tweet Rewrite (Improve Performance)

This tweet got [NUMBER] impressions but only [NUMBER] engagements:

"[PASTE YOUR UNDERPERFORMING TWEET]"

Diagnose why it underperformed and write 3 improved versions. For each version, explain what you changed and why it should perform better. Keep the core message identical.

Prompt 14: Testimonial Tweet

A customer said this about my product: "[PASTE TESTIMONIAL OR FEEDBACK]"

Turn this into a tweet that:

- Leads with the result/transformation, not the praise
- Includes the specific metric or outcome
- Doesn't sound like a paid ad
- Ends with a subtle CTA (not "buy now" – more like "DM me if you want the same")

Prompt 15: Pinned Tweet

Write a pinned tweet for my Twitter profile.

Who I am: [BRIEF DESCRIPTION]

What I offer: [PRODUCT/SERVICE]

Best result: [YOUR BEST METRIC OR CASE STUDY]

CTA: [WHAT YOU WANT VISITORS TO DO – follow, DM, click link]

The pinned tweet should tell a first-time visitor exactly who I am, why they should care, and what to do next. Under 280 characters. No fluff.

Newsletter Prompts (16-25)

Prompt 16: Newsletter Subject Lines

Write 10 email subject lines for a newsletter about [TOPIC].

This week's content covers: [BRIEF SUMMARY OF WHAT'S IN THE EMAIL]

Rules:

- Under 50 characters each (mobile preview cutoff)
- No clickbait that doesn't deliver
- 3 should use numbers, 3 should use curiosity gaps, 2 should use urgency, 2 should be direct
- Test group: which 2 would you A/B test and why?

Prompt 17: Newsletter Intro Paragraph

Write the opening paragraph for a newsletter about [THIS WEEK'S TOPIC].

My newsletter tone is: [CASUAL/PROFESSIONAL/IRREVERENT – pick one]

My audience is: [DESCRIBE THEM]

The key insight this week: [ONE SENTENCE SUMMARY]

The intro must:

- Hook in the first sentence (no "Hey everyone, hope you had a great week")
- Set up WHY this topic matters right now
- Transition naturally into the first section
- Be under 100 words

Prompt 18: Newsletter from Raw Notes

Turn these raw notes into a polished newsletter section:

[PASTE YOUR ROUGH NOTES, BULLET POINTS, OR STREAM-OF-CONSCIOUSNESS THOUGHTS]

Target length: [300/500/800] words

Tone: [DESCRIBE YOUR NEWSLETTER VOICE]

Format: Use headers, bold key phrases, and short paragraphs (2–3 sentences max)

Add one actionable takeaway the reader can implement today.

Prompt 19: Weekly Roundup Newsletter

Write a weekly roundup newsletter covering these items:

1. [ITEM 1 – brief description]
2. [ITEM 2]
3. [ITEM 3]
4. [ITEM 4]
5. [ITEM 5]

For each item, write:

- A one-line summary (what happened)
- A one-line analysis (why it matters to [YOUR AUDIENCE])
- A link placeholder: [LINK]

Add an intro that ties the items together with a theme, and a closing thought that gives the reader one thing to think about this week.

Prompt 20: Newsletter CTA Block

Write a CTA section for my newsletter that promotes [PRODUCT/SERVICE/RESOURCE].

Details:

- What it is: [DESCRIPTION]
- Price: [PRICE or FREE]
- Key benefit: [ONE SENTENCE]
- URL: [LINK]

The CTA must:

- Not feel like an ad (integrate it naturally)
- Lead with the problem it solves, not the features
- Include a specific, time-bound reason to act now (if applicable)
- Be under 75 words

Prompt 21: Welcome Email Sequence (3 Emails)

Write a 3-email welcome sequence for new subscribers to my [NICHE] newsletter.

Email 1 (immediate): Welcome + set expectations (what they'll get, how often) + deliver the lead magnet if applicable

Email 2 (Day 2): Your best/most popular piece of content, repackaged as "the one thing most people get wrong about [TOPIC]"

Email 3 (Day 4): Soft pitch for [PRODUCT/SERVICE] with a case study or result

My newsletter: [NAME AND BRIEF DESCRIPTION]

My product: [WHAT YOU SELL]

Tone: [YOUR VOICE]

Prompt 22: Newsletter Growth Post

Write a tweet promoting my newsletter that doesn't sound like "subscribe to my newsletter."

Newsletter name: [NAME]

What subscribers get: [SPECIFIC VALUE]

Current subscriber count: [NUMBER]

Best issue topic: [TOPIC OF YOUR BEST NEWSLETTER]

The tweet should share a valuable insight FROM the newsletter, then mention the newsletter as the source. The value comes first, the plug comes last.

Prompt 23: Sponsorship Pitch Email

Write a cold email pitching [BRAND/COMPANY] to sponsor my newsletter.

My newsletter:

- Name: [NAME]
- Subscribers: [NUMBER]
- Open rate: [PERCENTAGE]
- Niche: [TOPIC]
- Audience demographics: [WHO READS IT]

What I'm offering:

- [SPONSORSHIP FORMAT – dedicated email, banner, mention, etc.]
- [PRICE]

The email should be under 150 words, lead with why their product is relevant to my audience, and include one specific metric that proves the value.

Prompt 24: Newsletter Content Repurpose

Take this newsletter issue and create:

1. A Twitter thread (8 tweets)
2. A LinkedIn post (150–200 words)
3. A Reddit post for r/[SUBREDDIT] (follows community norms – value first, no self-promotion in the post body)

Newsletter content:

[PASTE NEWSLETTER]

Each output should feel native to its platform, not like a copy-paste job.

Prompt 25: Monthly Newsletter Review

Here are my newsletter stats for the last 4 issues:

Issue 1: Subject "[SUBJECT]" – Open rate: [%], Click rate: [%]
Issue 2: Subject "[SUBJECT]" – Open rate: [%], Click rate: [%]
Issue 3: Subject "[SUBJECT]" – Open rate: [%], Click rate: [%]
Issue 4: Subject "[SUBJECT]" – Open rate: [%], Click rate: [%]

Analyze the patterns:

- Which subject line style performed best and why?
- What's driving clicks vs. what's driving opens?
- Give me 3 specific recommendations for next month's subject lines and content strategy
- Suggest 4 subject lines for next month based on what the data shows works

Blog / Long-Form Prompts (26-40)

Prompt 26: Blog Post Outline

Create a detailed outline for a blog post titled "[TITLE]".

Target audience: [WHO]

Target keyword: [SEO KEYWORD]

Target length: [1500/2500/4000] words

Intent: [INFORMATIONAL / TRANSACTIONAL / COMPARISON]

Outline format:

- H1 (title)
- Intro (hook, problem statement, what they'll learn)
- H2 sections (4-6 main sections)
 - Key points under each (2-3 bullet points)
- H2: Frequently Asked Questions (3-5 questions)
- Conclusion with CTA

For each H2, suggest a specific example, stat, or case study to include.

Prompt 27: Blog Intro That Hooks

Write the opening 150 words of a blog post about [TOPIC].

The reader searched for: "[SEARCH QUERY]"

The intro must:

- Acknowledge their problem in the first sentence
- Agitate it in the second sentence (what happens if they don't solve it)
- Promise the solution in the third sentence
- NOT start with a question, a definition, or "In today's fast-paced world"
- Include the target keyword naturally within the first 100 words

Prompt 28: How-To Blog Post

Write a complete how-to blog post: "[HOW TO TITLE]"

Requirements:

- 1500-2000 words
- Step-by-step format with numbered steps
- Each step: what to do, why it matters, common mistake to avoid
- Include one real tool recommendation per step (with pricing)
- Screenshots/images marked as [IMAGE: description of what to capture]
- FAQ section at the end (4 questions)
- Target keyword: [KEYWORD] – use it in H1, first paragraph, one H2, and conclusion

Prompt 29: Comparison Blog Post

Write a comparison post: "[PRODUCT A] vs [PRODUCT B]: Which Is Better for [USE CASE]?"

Cover these dimensions:

- Pricing (exact plans and prices)
- Ease of use (specific UX differences)
- Features (what each has that the other doesn't)
- Best for (who should pick which)
- Deal-breakers (when each product is the WRONG choice)

Include a comparison table. End with a clear recommendation, not "it depends." Take a stance.

My audience is [DESCRIBE THEM]. They care most about [TOP PRIORITY].

Prompt 30: Listicle Blog Post

Write a listicle: "[NUMBER] Best [TOOLS/STRATEGIES/RESOURCES] for [USE CASE] in [YEAR]"

For each item include:

- Name and one-line description
- Pricing (exact – free, \$X/month, etc.)
- Best feature (the ONE thing that makes it worth using)
- Limitation (the ONE thing that might be a deal-breaker)
- Who it's for (one sentence)

Order by: best overall first, budget option included in top 5, most niche options at the end.

Items: [NUMBER – between 7 and 15]

Prompt 31: Case Study Blog Post

Write a case study blog post about how [CLIENT/USER/I] achieved [RESULT].

Facts:

- Starting point: [WHERE THEY WERE]
- End result: [WHERE THEY ARE NOW]
- Timeframe: [HOW LONG IT TOOK]
- Key actions: [3-5 SPECIFIC THINGS THEY DID]
- Tools used: [LIST TOOLS]

Structure: Situation > Problem > Solution > Results > Key Takeaways

Length: 1200-1800 words

Include direct quotes (write realistic ones based on the facts above).

End with a CTA relevant to the reader: "If you want similar results, [ACTION]"

Prompt 32: SEO Meta Description

Write 3 meta description options for this blog post:

Title: [BLOG POST TITLE]

Target keyword: [KEYWORD]

Summary: [1-2 SENTENCE SUMMARY OF THE POST]

Each meta description must:

- Be 150-160 characters (hard limit)
- Include the target keyword
- Have a clear value proposition
- End with action-oriented language
- NOT start with "Learn how to" or "Discover"

Prompt 33: Content Upgrade / Lead Magnet

I wrote a blog post about [TOPIC]. Suggest 3 content upgrade ideas that I can offer in exchange for an email address.

Each content upgrade should:

- Be directly related to the blog post topic
- Take me under 2 hours to create
- Provide immediate, tangible value
- Be deliverable as a PDF, spreadsheet, or template

For each suggestion, write the opt-in copy (headline + 2-sentence description + CTA button text).

Prompt 34: Blog Post from Podcast/Video Transcript

Turn this transcript into a polished blog post:

[PASTE TRANSCRIPT OR KEY SECTIONS]

Rules:

- Remove all filler words, "ums," and conversational tangents
- Add structure: H2 headers every 300-400 words
- Keep the speaker's voice and personality – don't make it sound like a textbook
- Add a "Key Takeaways" section at the top (3-5 bullet points)
- Target length: [WORDS]
- Bold the most quotable sentences (these become social media pull quotes)

Prompt 35: Blog Post Conclusion + CTA

Write the conclusion for a blog post about [TOPIC].

Main points covered in the post:

1. [POINT 1]
2. [POINT 2]
3. [POINT 3]

CTA goal: [WHAT YOU WANT THE READER TO DO – subscribe, buy, try, share]

The conclusion must:

- Summarize in 2–3 sentences (not repeat every point)
- Reinforce the one most important insight
- Transition naturally into the CTA
- NOT say "In conclusion" or "To wrap things up"
- Be under 150 words

Prompt 36: Content Calendar (30 Days)

Create a 30-day content calendar for a [NICHE] blog.

Target audience: [WHO]

Publishing frequency: [X posts per week]

Content pillars: [3–4 TOPIC CATEGORIES]

Goal: [TRAFFIC / EMAIL SIGNUPS / PRODUCT SALES]

For each post, provide:

- Working title
- Target keyword (long-tail, suggest based on niche)
- Content type (how-to, listicle, case study, comparison, opinion)
- Estimated word count
- Internal linking opportunity (which other posts on the calendar it should link to)

Prompt 37: Expert Roundup Post

I'm writing an expert roundup post: "[TITLE – e.g., 12 Experts Share Their Best Advice on X]"

Write the outreach email I should send to experts asking for their contribution:

- Under 100 words
- Specific question for them to answer
- Deadline
- What they get in return (link back, social promotion)

Then write the intro and conclusion for the roundup post (I'll fill in the expert quotes).

Prompt 38: Pillar Page Outline

Create a pillar page outline for the topic: "[BROAD TOPIC]"

This pillar page should:

- Be 3000–5000 words
- Cover the topic comprehensively (someone should not need to read anything else)
- Link to 8–12 supporting blog posts (suggest titles for posts I should write)
- Include an FAQ section (8–10 questions)
- Have a table of contents
- Target the main keyword: [KEYWORD]

For each section, note which supporting blog post it should link to and what long-tail keyword that supporting post should target.

Prompt 39: Product Description

Write a product description for [PRODUCT NAME].

Details:

- What it is: [DESCRIPTION]
- Price: [PRICE]
- Key features: [LIST 3–5 FEATURES]
- Target buyer: [WHO]
- Problem it solves: [PAIN POINT]

Write 3 versions:

1. Short (50 words) – for product cards and ads
2. Medium (150 words) – for product pages
3. Long (300 words) – for landing pages

Each version should lead with the benefit, not the feature. "Save 5 hours per week" not "Includes automation features."

Prompt 40: Content Audit Prompt

I'm going to paste the titles and URLs of my last 20 blog posts. Analyze them and tell me:

1. Content gaps: What topics am I NOT covering that my audience needs?
2. Cannibalization: Are any posts competing for the same keyword?
3. Update candidates: Which posts likely have outdated information based on their titles?
4. Consolidation: Which thin posts could be merged into one comprehensive post?
5. Winners: Based on the titles alone, which 3 posts are most likely to perform well for SEO and why?

My blog posts:

[PASTE TITLES AND URLS]

My niche: [NICHE]

My audience: [AUDIENCE]

Section 2: Outreach — 40 Production Prompts

Cold Email Prompts (41-55)

Prompt 41: Cold Email — First Touch

Write a cold email to [PROSPECT TYPE – e.g., "ecommerce store owners doing \$1M-\$5M/year"].

I sell: [YOUR SERVICE/PRODUCT]

Key result I deliver: [SPECIFIC OUTCOME WITH NUMBERS]

Proof: [CASE STUDY, METRIC, OR SOCIAL PROOF]

Rules:

- Subject line under 6 words
- Email body under 85 words (mobile-friendly)
- First sentence references something specific about THEM (not about me)
- One clear CTA – a question, not a demand
- No "I hope this email finds you well"
- No "I'd love to hop on a quick call"
- No attachments, no links in the first email

Prompt 42: Cold Email — Follow-Up #1 (3 Days Later)

Write follow-up email #1 for someone who didn't reply to this cold email:

[PASTE YOUR FIRST EMAIL]

Rules:

- Reply to the same thread (not a new email)
- Under 50 words
- Add one new piece of value (insight, stat, or relevant example)
- Don't reference that they didn't reply
- Don't say "just following up" or "bumping this"
- End with a yes/no question (easy to answer)

Prompt 43: Cold Email — Follow-Up #2 (7 Days Later)

Write follow-up email #2. They haven't responded to two emails.

Original offer: [WHAT YOU SELL]

Their industry: [INDUSTRY]

This email should:

- Share a genuinely useful insight about their industry (not generic advice)
- NOT mention your product at all
- Position you as someone who understands their world
- End with: "Thought this might be useful. Happy to share more if relevant."
- Under 60 words

Prompt 44: Cold Email — Breakup Email (14 Days Later)

Write a breakup email – the final follow-up.

Rules:

- Under 40 words
- Acknowledge you've reached out a few times
- Make it easy to say no: "Totally fine if the timing isn't right"
- Leave the door open without being desperate
- Include a subtle loss aversion element
- No guilt-tripping

Prompt 45: Cold Email — Social Proof Version

Write a cold email that leads with social proof instead of a pitch.

My results:

- Client 1: [NAME/INDUSTRY] – [RESULT]
- Client 2: [NAME/INDUSTRY] – [RESULT]
- Client 3: [NAME/INDUSTRY] – [RESULT]

Prospect's industry: [INDUSTRY]

What I'm offering: [SERVICE]

Structure: "[PROSPECT INDUSTRY] companies like [SIMILAR COMPANY] are getting [RESULT]. Here's how: [ONE SENTENCE]. Worth exploring for [PROSPECT COMPANY]?"

Prompt 46: Cold Email — Personalized at Scale

I need to send cold emails to [NUMBER] [PROSPECT TYPE].

Here's what I know about each prospect:

- Company name
- Their website URL
- Their role/title
- One recent post or article they published

Write a cold email TEMPLATE with personalization fields that I can fill in for each prospect. Mark each personalization point with {{FIELD_NAME}}.

The personalization should feel researched, not templated. Each email

should look like I spent 10 minutes on it, even though I spent 30 seconds.

Template should be under 80 words with personalization filled in.

Prompt 47: Cold Email — Referral Request

Write an email asking a current client to refer me to someone in their network.

My relationship with this client: [BRIEF DESCRIPTION]

Result I achieved for them: [SPECIFIC OUTCOME]

Who I want to be referred to: [IDEAL PROSPECT DESCRIPTION]

Rules:

- Make it easy (suggest exact language they can forward)
- Don't be vague – tell them exactly who to think of
- Offer to write the intro email for them
- Under 100 words
- Don't offer a referral bonus unless I specify one

Prompt 48: Cold Email — Event Follow-Up

Write a follow-up email to someone I met at [EVENT NAME].

Context of our conversation: [WHAT YOU TALKED ABOUT – 1–2 sentences]

What I want from them: [SPECIFIC ASK – meeting, intro, feedback, etc.]

Rules:

- Send within 24 hours
- Reference the specific conversation (not generic "great meeting you")
- Include the ONE thing you discussed that connects to your ask
- Propose a specific next step with a date/time
- Under 75 words

Prompt 49: Cold Email — Free Audit / Loom Video

Write a cold email offering a free [AUDIT TYPE] to [PROSPECT TYPE].

What I'll audit: [SPECIFIC THING – their website, ad campaigns, email sequences, etc.]

How I'll deliver it: [LOOM VIDEO / PDF REPORT / GOOGLE DOC]

Time it takes me: [HOW LONG]

What they'll learn: [2–3 SPECIFIC INSIGHTS THEY'LL GET]

The email should:

- Lead with what's wrong (a specific observation about THEIR business)
- Offer the audit as a no-strings gift
- NOT mention my paid service at all in this email
- Under 80 words

Prompt 50: Cold Email Subject Lines (Batch)

Generate 20 cold email subject lines for [SERVICE] targeting [PROSPECT TYPE].

Split into 4 categories:

1. Question-based (5 lines)
2. Number/result-based (5 lines)
3. Curiosity-based (5 lines)
4. Direct/straightforward (5 lines)

Rules:

- All under 6 words
- No spam trigger words (free, guarantee, act now, limited time)
- No ALL CAPS
- No exclamation marks
- Each should pass the "would I open this?" test
- Include predicted open rate ranking (best to worst within each category)

Prompt 51: Cold Email for Agency Services

Write a cold email pitching [SERVICE TYPE] services to [BUSINESS TYPE].

I charge: [PRICING MODEL]

My turnaround: [TIMEFRAME]

My differentiator: [WHAT MAKES ME DIFFERENT FROM THE 500 OTHER PEOPLE OFFERING THIS]

The email must not sound like every other agency pitch. Avoid:

- "We help businesses like yours..."
- "Our team of experts..."
- "We've worked with brands like..."

Instead: Start with their specific problem, state the cost of not fixing it, offer to fix it with a specific scope and timeline. Under 90 words.

Prompt 52: Warm Email — Re-Engage Lost Deal

Write an email to re-engage a prospect who went cold [TIMEFRAME] ago.

What happened: [BRIEF CONTEXT — they ghosted, said "not now," budget issue, etc.]

What's changed since then: [NEW RESULT, FEATURE, CASE STUDY, OR MARKET SHIFT]

Rules:

- Don't reference the ghosting negatively
- Lead with what's new (give them a reason to re-engage)

- Make it feel like a fresh conversation, not a guilt trip
- One clear, low-commitment CTA
- Under 70 words

Prompt 53: Partnership Outreach Email

Write an email proposing a partnership with [COMPANY/PERSON].

My business: [WHAT I DO]

Their business: [WHAT THEY DO]

Partnership idea: [SPECIFIC PROPOSAL – co-promotion, bundle, affiliate, content collab]

What's in it for them: [SPECIFIC BENEFIT]

What's in it for me: [BE HONEST]

Under 120 words. Lead with the benefit to THEM. Don't oversell. Propose a 15-minute call to explore, not a commitment.

Prompt 54: Cold Email — CEO/Founder Targeting

Write a cold email to the CEO/founder of a [COMPANY SIZE] [INDUSTRY] company.

Key insight: CEOs don't read long emails. They skim.

Rules:

- 3 sentences maximum
- Sentence 1: One specific observation about their business
- Sentence 2: The result I can deliver, with a number
- Sentence 3: "Worth a 15-minute call this week?"
- Subject line: Their company name only (highest open rate for exec-level)

Prompt 55: Cold Email A/B Test Framework

I'm A/B testing cold emails for [SERVICE] targeting [PROSPECT TYPE].

Write two versions of the same email, changing ONE variable:

Test 1: Tone (Version A: professional / Version B: casual)

Test 2: CTA (Version A: ask for a call / Version B: ask a question)

Test 3: Opening (Version A: compliment / Version B: observation about their business)

For each test, write both versions and predict which will win based on [INDUSTRY] norms. Under 80 words per version.

LinkedIn Prompts (56-65)

Prompt 56: LinkedIn Connection Request

Write 5 LinkedIn connection request messages for [PROSPECT TYPE].

Context: I want to connect because [REASON – genuine, not salesy].

Rules:

- Under 300 characters each (LinkedIn limit)
- No pitch in the connection request
- Reference something specific (their content, company, mutual connection)
- Each should use a different approach: compliment, question, shared interest, value offer, mutual connection

Prompt 57: LinkedIn Post — Thought Leadership

Write a LinkedIn post about [TOPIC] that positions me as an expert.

My experience: [RELEVANT BACKGROUND]

Key insight: [THE ONE THING I WANT PEOPLE TO REMEMBER]

Structure:

- Hook line (bold, under 15 words – this shows above the "see more" fold)
- 2–3 short paragraphs (2–3 sentences each)
- Bullet list of 3–5 tactical points
- Closing question to drive comments

Rules:

- No "I'm humbled to announce"
- No corporate jargon
- Use line breaks aggressively (LinkedIn's algorithm rewards dwell time)
- Under 200 words total

Prompt 58: LinkedIn DM — After Connection Accepted

Write a LinkedIn DM to send after [PROSPECT TYPE] accepts my connection request.

Rules:

- Thank them briefly (one sentence)
- Provide immediate value (share a relevant resource, insight, or tool)
- Do NOT pitch anything
- Do NOT ask for a call
- End with a genuine question about their work

- Under 60 words
- This is message 1 of 3. The pitch comes in message 3, not here.

Prompt 59: LinkedIn DM — Follow-Up (Value Add)

Write LinkedIn DM #2 (sent 5–7 days after message 1).

Context from message 1: [WHAT YOU DISCUSSED]

Their industry: [INDUSTRY]

Something useful I can share: [ARTICLE, TOOL, INSIGHT, CASE STUDY]

This message should:

- Reference our previous exchange naturally
- Share the value-add without expectation
- Build genuine rapport
- Still NOT pitch anything
- Under 50 words

Prompt 60: LinkedIn DM — Soft Pitch

Write LinkedIn DM #3 – the soft pitch.

Previous context: [SUMMARY OF MESSAGES 1 AND 2]

What I sell: [SERVICE/PRODUCT]

Why it's relevant to them: [SPECIFIC CONNECTION]

This message should:

- Transition naturally from the relationship built in messages 1–2
- Frame the pitch as "thought of you when..." not "I'd like to sell you..."
- Offer something specific (audit, strategy call, sample)
- Give them an easy out: "If it's not relevant, no worries at all"
- Under 70 words

Prompt 61: LinkedIn Post — Personal Story

Write a LinkedIn post sharing a professional lesson I learned.

The story: [WHAT HAPPENED – 2–3 sentences of context]

The lesson: [WHAT I LEARNED]

The takeaway for the reader: [HOW THEY CAN APPLY THIS]

Structure: Start with the failure or challenge (hook), walk through what happened (middle), land the lesson (end). Use short paragraphs. End with "What's a lesson you learned the hard way?" to drive comments.

Under 180 words. No "5 years ago I was broke, now I drive a Lambo" energy.

Prompt 62: LinkedIn Comment Strategy

I want to comment on posts from [TARGET ACCOUNTS – industry leaders, potential clients, etc.].

Give me 5 comment templates that add value without being generic:

1. "Agree + add data point" template
2. "Respectful disagreement + alternative perspective" template
3. "Personal experience that supports their point" template
4. "Question that advances the conversation" template
5. "Resource recommendation that's relevant" template

Each template should be 2–3 sentences. Never say "Great post!" or "So true!" as the opening.

Prompt 63: LinkedIn Article Outline

Create an outline for a LinkedIn article about [TOPIC].

Target audience: [WHO]

Goal: [ESTABLISH EXPERTISE / GENERATE LEADS / BUILD BRAND]

Length: 800–1200 words

Include:

- A headline that works on LinkedIn (different from blog SEO – optimize for clicks, not keywords)
- 4–6 sections with H2 headers
- Key points for each section
- A CTA at the end that directs readers to [DESIRED ACTION]

Prompt 64: LinkedIn Recommendation Request

Write a message asking [PERSON – client, colleague, manager] for a LinkedIn recommendation.

Our relationship: [HOW YOU KNOW THEM]

What I'd like them to highlight: [SPECIFIC SKILLS OR RESULTS]

Why now: [REASON – updating profile, job search, building credibility]

Rules:

- Make it easy for them (suggest 2–3 specific points they could mention)
- Offer to write a draft they can edit
- Under 80 words
- Not awkward

Prompt 65: LinkedIn Profile Optimization

Rewrite my LinkedIn sections for maximum visibility and conversion.

Current headline: [YOUR HEADLINE]

Current about section: [YOUR ABOUT]

My target audience: [WHO I WANT TO ATTRACT]

My offer: [WHAT I SELL/DO]

Best results: [TOP 2-3 ACHIEVEMENTS WITH NUMBERS]

Rewrite:

1. Headline (under 120 characters, benefit-driven, includes keywords)
2. About section (under 250 words, first person, specific results, clear CTA)
3. Featured section suggestions (what to pin – 3 ideas)

DM / Other Outreach Prompts (66-80)

Prompt 66: Twitter DM — Cold

Write a Twitter DM to [PROSPECT TYPE] who I've never interacted with.

What I want: [SPECIFIC ASK – feedback, collaboration, interview, etc.]

Why them specifically: [WHAT MAKES THEM THE RIGHT PERSON]

What's in it for them: [BENEFIT]

Rules:

- Under 280 characters (first message should be SHORT)
- No "Hey, big fan of your work" openings
- Lead with what you can give them, not what you want
- One clear question, easy to answer with yes/no

Prompt 67: Twitter DM — Warm (After Engagement)

I've been engaging with [PERSON]'s tweets for [TIMEFRAME]. We've had [NUMBER] public interactions. Now I want to DM them.

Our interactions: [BRIEF SUMMARY]

What I want to propose: [COLLABORATION, INTRO, QUESTION, etc.]

Write a DM that:

- References a specific interaction we had
- Transitions naturally to the ask
- Doesn't feel like all the engagement was just a sales funnel
- Under 200 characters for the opening message

Prompt 68: Instagram DM — Collaboration

Write an Instagram DM pitching a collaboration to [CREATOR TYPE] with [FOLLOWER COUNT].

My account: [SIZE AND NICHE]

Collab idea: [SPECIFIC PROPOSAL]

What they get: [BENEFIT – exposure, content, product, money]

Rules:

- Under 150 words
- Compliment must be specific (reference a specific post or reel)
- Proposal must be concrete (not "let's collab sometime")
- Include timeline and next step

Prompt 69: Community DM — Value First

Write a DM to send to someone in a [SLACK/DISCORD/COMMUNITY] group.

Context: They posted about [PROBLEM/QUESTION] in the group.

My solution/help: [HOW I CAN HELP – for free, no pitch]

The DM should:

- Reference their specific post
- Offer concrete help (not "let me know if I can help")
- Share a specific resource, answer, or offer to hop on a call
- NOT mention my product or service
- Under 80 words

Prompt 70: Podcast Guest Pitch

Write a pitch email to get on [PODCAST NAME] as a guest.

Podcast topic: [WHAT THE PODCAST IS ABOUT]

Host name: [NAME]

My expertise: [WHAT I KNOW]

Episode idea: [SPECIFIC TOPIC I'D DISCUSS]

Why their audience cares: [CONCRETE BENEFIT FOR LISTENERS]

My credibility: [RELEVANT RESULTS OR EXPERIENCE]

Rules:

- Under 150 words
- Suggest 3 specific episode titles
- Include 3 talking points for each title
- Reference a specific past episode I liked and why
- Make it easy to say yes (I'll promote to my [NUMBER] audience)

Prompt 71: Influencer Gifting Email

Write an email offering a free [PRODUCT] to [INFLUENCER TYPE] in exchange for honest coverage.

My product: [DESCRIPTION]

Their audience: [SIZE AND DEMOGRAPHICS]

What I'm offering: [FREE PRODUCT + any additional perks]

What I'm asking for: [STORY, POST, REVIEW – be specific]

Rules:

- Don't call it "influencer marketing" in the email
- Frame it as "thought you might genuinely find this useful"
- No contractual language
- Make saying no easy
- Under 100 words

Prompt 72: Testimonial Request Email

Write an email asking a happy customer for a testimonial.

Customer name: [NAME]

What they bought: [PRODUCT/SERVICE]

Result they got: [SPECIFIC OUTCOME]

Include:

- 5 specific questions for them to answer (makes it easy – they don't have to write from scratch)
- Permission request to use their name and company
- Offer to draft something based on their answers that they can approve
- Under 100 words

Questions should extract: problem before, solution experience, specific result, would they recommend, one-line quote.

Prompt 73: Speaker Application

Write a speaker application for [CONFERENCE/EVENT NAME].

Event topic: [THEME]

My talk title: [PROPOSED TITLE]

Talk description: [3-5 SENTENCES]

My background: [RELEVANT EXPERIENCE]

Previous talks: [LIST OR "FIRST TIME" – both are fine]

Format the application to match typical CFP (Call for Proposals) requirements:

- Title (under 75 characters)
- Abstract (200-300 words)
- Target audience level (beginner/intermediate/advanced)

- 3-5 learning outcomes
- Speaker bio (100 words, third person)

Prompt 74: Joint Venture Email

Write an email proposing a joint venture with [BUSINESS/PERSON].

My audience: [SIZE AND NICHE]

Their audience: [SIZE AND NICHE]

JV proposal: [SPECIFIC – webinar, bundle, cross-promotion, co-created product]

Revenue split: [PROPOSED SPLIT]

Timeline: [WHEN]

The email should:

- Lead with the overlap between our audiences
- Propose a specific, time-bound project (not an open-ended partnership)
- Include projected numbers (audience reach, expected conversions, revenue estimate)
- Under 150 words

Prompt 75: Affiliate Recruitment Email

Write an email recruiting [PERSON/BUSINESS TYPE] as an affiliate for my product.

My product: [DESCRIPTION]

Price: [PRICE]

Commission: [PERCENTAGE OR FLAT RATE]

Cookie duration: [DAYS]

Average conversion rate: [PERCENTAGE]

What affiliates earn per month on average: [AMOUNT]

The email should:

- Calculate their potential earnings based on their audience size
- Highlight the commission vs. competitors in the space
- Include the signup link
- Mention any resources I provide (swipe copy, banners, email templates)
- Under 120 words

Prompt 76: Press/Media Pitch

Write a media pitch email for [PUBLICATION/JOURNALIST].

Story angle: [THE NEWS HOOK – why should they care NOW?]

My role in the story: [EXPERT, FOUNDER, DATA SOURCE]

Key stat or data point: [THE NUMBER THAT MAKES THIS NEWSWORTHY]

Journalist's beat: [WHAT THEY TYPICALLY COVER]

Rules:

- Subject line: under 8 words, includes the news hook
- Under 100 words
- Lead with the story, not with me
- Include 1 key data point
- Offer to provide: quote, data, interview, exclusive
- No attachments in the first email

Prompt 77: Beta User Recruitment

Write a message recruiting beta testers for [PRODUCT].

Where I'm posting: [REDDIT / TWITTER / DISCORD / INDIE HACKERS]

What the product does: [ONE SENTENCE]

What beta testers get: [FREE ACCESS, LIFETIME DEAL, INPUT ON FEATURES]

What I need from them: [FEEDBACK FREQUENCY, BUG REPORTS, etc.]

How many I need: [NUMBER]

Adapt the message to the platform's culture. Reddit hates self-promotion – lead with value. Twitter is casual. Indie Hackers wants the backstory.

Prompt 78: Apology/Recovery Email

Write an email apologizing for [ISSUE – late delivery, bug, mistake, missed deadline].

What happened: [FACTUAL DESCRIPTION]

Impact on them: [HOW IT AFFECTED THE CUSTOMER]

What I've done to fix it: [SPECIFIC ACTIONS TAKEN]

What I'm offering as compensation: [CREDIT, REFUND, FREE MONTH, etc.]

Rules:

- Own it completely. No "we apologize for any inconvenience" – say what went wrong.
- Don't over-explain or make excuses
- Lead with the fix, not the apology
- Under 100 words
- End with a specific next step

Prompt 79: Upsell Email (Existing Customer)

Write an email to existing customers offering [UPSELL PRODUCT/SERVICE].

What they already bought: [CURRENT PRODUCT]

What I'm offering next: [UPSELL]

Price: [PRICE]

Why now: [REASON – new feature, limited offer, natural next step]

Discount for existing customers: [IF ANY]

Rules:

- Reference the value they've already gotten (be specific)
- Frame the upsell as a natural evolution, not a separate purchase
- Include one customer result from someone who upgraded
- One CTA, no pressure
- Under 120 words

Prompt 80: Reactivation Email (Churned Customer)

Write an email to a customer who cancelled [TIMEFRAME] ago.

What they were paying: [PRICE]

Why they likely cancelled: [REASON IF KNOWN, or "unknown"]

What's changed since they left: [NEW FEATURES, IMPROVEMENTS, RESULTS]

Win-back offer: [DISCOUNT, FREE MONTH, etc.]

Rules:

- Don't be desperate
- Lead with what's new (give them a reason to come back)
- Acknowledge they left without asking why (unless I want feedback)
- Make reactivating effortless (one-click link)
- Under 90 words

Section 3: Code & Building — 40 Production Prompts

App Scaffolding Prompts (81-95)

Prompt 81: PWA Scaffold

Build a Progressive Web App called [APP NAME].

Purpose: [ONE SENTENCE DESCRIPTION]

Tech stack:

- Vanilla JS (no frameworks)
- CSS Grid + Flexbox for layout
- localStorage for data persistence
- Service worker for offline support

File structure:

- index.html
- css/style.css
- js/app.js
- js/storage.js (localStorage wrapper with get/set/delete/getAll methods)

- manifest.json (standalone display, [THEME COLOR] accent)
- sw.js (cache-first strategy, versioned cache name)

Design:

- Mobile-first (320px base, max-width 480px centered on desktop)
- Dark mode default: #0A0A0A background, [ACCENT COLOR] highlights, #F5F5F5 text
- System font stack (no Google Fonts, faster load)
- Touch targets minimum 44x44px

Start with the data model, then build the UI, then add PWA features.

Prompt 82: Landing Page Generator

Build a single-page landing page for [PRODUCT/SERVICE].

Sections (top to bottom):

1. Hero: Headline + subheadline + CTA button + hero image placeholder
2. Problem: 3 pain points with icons
3. Solution: What the product does (3 features with descriptions)
4. Social proof: Testimonial cards (3 slots with placeholder text)
5. Pricing: [PRICING TIERS – describe them]
6. FAQ: 5 expandable questions
7. Footer CTA: Final call to action + email capture

Technical requirements:

- Single HTML file with inline CSS (under 500 lines total)
- No JavaScript except for FAQ accordion and smooth scroll
- Fully responsive (320px to 1440px)
- Load time under 1 second on 3G
- Color scheme: [COLORS]
- Font: Inter via system fonts fallback stack

CTA button should link to: [URL or "Stripe payment link placeholder"]

Prompt 83: REST API Scaffold (Node.js)

Build a REST API with these endpoints:

Resource: [RESOURCE NAME – e.g., "tasks", "users", "products"]

Endpoints:

- GET /api/[resource] – list all (with pagination: ?page=1&limit=20)
- GET /api/[resource]/:id – get one by ID
- POST /api/[resource] – create new
- PUT /api/[resource]/:id – update by ID
- DELETE /api/[resource]/:id – delete by ID

Tech:

- Node.js + Express
- SQLite via better-sqlite3 (no ORM, raw SQL)

- Input validation on POST/PUT
- Error handling middleware (consistent error format)
- CORS enabled
- Rate limiting (100 requests/15 minutes per IP)

Data model:

[DESCRIBE YOUR FIELDS – e.g., "title (string, required), description (string, optional), status (enum: todo/doing/done), created_at (auto)"]

Include a seed script that populates 20 sample records.

Prompt 84: Chrome Extension Scaffold

Build a Chrome extension called [NAME].

What it does: [ONE SENTENCE]

Manifest V3 structure:

- manifest.json (permissions: [LIST NEEDED PERMISSIONS])
- popup.html + popup.js (the UI when you click the extension icon)
- content.js (runs on [WHICH PAGES – e.g., "all pages", "only twitter.com"])
- background.js (service worker for event handling)
- styles.css

Functionality:

[DESCRIBE WHAT THE EXTENSION DOES IN 3–5 BULLET POINTS]

Storage: Use chrome.storage.local for settings/data

Design: Match Chrome's design language (clean, minimal, 300px wide popup)

Prompt 85: Dashboard UI

Build a dashboard page with these components:

1. Top bar: App name (left), user avatar + dropdown (right)
2. Sidebar: Navigation with icons – [LIST 5–7 NAV ITEMS]
3. Main content area with:
 - Stats row: 4 metric cards (icon + number + label + trend arrow)
 - Chart placeholder: 600x300px area labeled "[CHART TYPE] goes here"
 - Data table: [COLUMNS] with sortable headers, 10 rows, pagination
4. Responsive: Sidebar collapses to hamburger menu below 768px

Use CSS Grid for the layout. No charting library – just the placeholder.

Stats to display: [LIST YOUR 4 KEY METRICS]

Color scheme: [COLORS]

Prompt 86: Authentication Flow

Build a complete auth flow using Supabase:

Pages:

1. Sign up (email + password)
2. Log in (email + password)
3. Password reset (email input → reset link)
4. Protected dashboard (redirects to login if not authenticated)

Requirements:

- Supabase JS client v2
- Session persistence (stays logged in on refresh)
- Loading states on all buttons
- Error messages displayed inline (not alerts)
- Redirect after login to /dashboard
- Redirect after logout to /login
- Password requirements shown in real-time (8+ chars, 1 number, 1 uppercase)

Supabase project URL: [PLACEHOLDER]

Supabase anon key: [PLACEHOLDER]

Include the SQL to create the users table in Supabase.

Prompt 87: Email Template (HTML)

Build a responsive HTML email template for [PURPOSE – welcome email, receipt, newsletter, etc.].

Requirements:

- Table-based layout (for email client compatibility)
- Inline CSS only (no <style> tags – Gmail strips them in some cases)
- Works in: Gmail, Outlook 365, Apple Mail, Yahoo Mail
- Max width: 600px, centered
- Mobile responsive (stacks to single column below 480px)

Sections:

- Logo header ([BRAND NAME] text + accent bar)
- [DESCRIBE CONTENT SECTIONS]
- CTA button ([BUTTON TEXT], [BUTTON COLOR], centered, 44px height minimum)
- Footer: Unsubscribe link, company address, social links

Colors: [BRAND COLORS]

Test by sending to yourself via a tool like Mailchimp or Postmark.

Prompt 88: CLI Tool

Build a command-line tool in [LANGUAGE – Node.js/Python/Bash] that [WHAT IT DOES].

Commands:

- [COMMAND 1]: [DESCRIPTION]
- [COMMAND 2]: [DESCRIPTION]
- [COMMAND 3]: [DESCRIPTION]

Requirements:

- --help flag shows usage for all commands
- Colored output (green for success, red for errors, yellow for warnings)
- Configuration file support (~/.toolnamerc or .toolnamerc in project root)
- Input validation with clear error messages
- Exit codes (0 for success, 1 for user error, 2 for system error)

Include a README with installation and usage examples.

Prompt 89: Form with Validation

Build a multi-step form with these fields:

Step 1: [FIELDS – e.g., "Name (required), Email (required, valid format), Phone (optional)"]

Step 2: [FIELDS]

Step 3: [FIELDS]

Review step: Show all entered data, allow editing any step

Requirements:

- Client-side validation (real-time, not just on submit)
- Error messages appear below each field
- Progress bar showing current step
- Back button on each step
- Data persists in sessionStorage (survives page refresh)
- Submit sends data to [ENDPOINT or "console.log for now"]
- Accessible: proper labels, ARIA attributes, keyboard navigation
- Mobile-friendly: fields stack vertically, 16px+ font (prevents iOS zoom)

Prompt 90: Stripe Checkout Integration

Integrate Stripe Checkout into my existing app.

Setup:

- Netlify/Vercel serverless function for the backend
- Stripe.js on the frontend (no sensitive keys in client code)

I need:

1. A "Buy Now" button that creates a Checkout session
2. A success page that verifies payment
3. A cancel page
4. A webhook handler for checkout.session.completed

Product details:

- Name: [PRODUCT NAME]
- Price: [AMOUNT] [CURRENCY]
- Type: [ONE-TIME or SUBSCRIPTION with INTERVAL]

Include:

- Environment variable setup instructions
- Test mode card numbers for testing
- The webhook secret verification code
- Error handling for failed payments

Prompt 91: Database Schema Design

Design a database schema for [APP TYPE – e.g., "a project management tool", "an e-commerce store"].

Requirements:

[LIST 5–10 FEATURES THE APP NEEDS TO SUPPORT]

Provide:

1. Entity-relationship description (which tables, how they relate)
2. SQL CREATE TABLE statements (PostgreSQL syntax)
3. Indexes for common queries
4. Sample INSERT statements (5 rows per table)
5. 3 example queries that the app would frequently run

Constraints:

- Use UUIDs for primary keys (not auto-increment)
- Include created_at and updated_at timestamps on every table
- Use soft deletes (deleted_at column) instead of hard deletes
- Foreign key constraints with appropriate ON DELETE behavior

Prompt 92: WebSocket Real-Time Feature

Add real-time functionality to my app using WebSockets.

Feature: [WHAT SHOULD UPDATE IN REAL-TIME – e.g., "live chat", "collaborative editing", "live notifications"]

Server (Node.js):

- Use the 'ws' package (not Socket.io – smaller, no fallback needed in 2024+)
- Handle: connection, message, close, error events
- Broadcast to all connected clients or send to specific client
- Heartbeat every 30 seconds to detect dead connections
- Reconnection logic on client side

Client:

- Connect on page load
- Auto-reconnect with exponential backoff (1s, 2s, 4s, 8s, max 30s)

- Queue messages while disconnected, send on reconnect
- Visual indicator showing connection status (green dot = connected, red = disconnected)

Prompt 93: Cron Job / Scheduled Task

Build a scheduled task that [WHAT IT DOES] every [FREQUENCY].

Runtime: [Node.js / Python]

Trigger: [CRON EXPRESSION – or describe the schedule and I'll set the cron]

The task should:

1. [STEP 1]
2. [STEP 2]
3. [STEP 3]

Requirements:

- Logging: Write start time, end time, and result to a log file
- Error handling: If the task fails, log the error and send a notification to [SLACK WEBHOOK URL or "console.error for now"]
- Idempotency: Running the task twice should not create duplicate data
- Lock file: Prevent two instances from running simultaneously

Include the crontab entry and instructions for setting it up on macOS (launchd) and Linux (cron).

Prompt 94: API Integration Wrapper

Build a wrapper/SDK for the [API NAME] API.

Base URL: [API BASE URL]

Auth method: [API KEY / OAUTH / BEARER TOKEN]

Rate limit: [REQUESTS PER MINUTE/HOUR]

Endpoints I need:

1. [ENDPOINT 1]: [METHOD] [PATH] – [DESCRIPTION]
2. [ENDPOINT 2]: [METHOD] [PATH] – [DESCRIPTION]
3. [ENDPOINT 3]: [METHOD] [PATH] – [DESCRIPTION]

The wrapper should:

- Handle authentication automatically
- Retry on 429 (rate limit) with exponential backoff
- Retry on 500/502/503 once
- Type-check inputs before sending requests
- Return parsed JSON, not raw responses
- Throw descriptive errors with the API's error message included

Language: [JavaScript / Python / TypeScript]

Prompt 95: Scraper / Data Extractor

Build a web scraper that extracts [DATA TYPE] from [WEBSITE/URL PATTERN].

Data to extract per page:

- [FIELD 1]: [WHERE TO FIND IT – CSS selector, XPath, or describe location]
- [FIELD 2]: [WHERE TO FIND IT]
- [FIELD 3]: [WHERE TO FIND IT]

Requirements:

- Use [cheerio for Node.js / BeautifulSoup for Python / Playwright for JS-rendered pages]
- Handle pagination: [DESCRIBE HOW PAGINATION WORKS ON THE SITE]
- Rate limiting: Max [NUMBER] requests per minute
- Output: Save to [CSV / JSON / SQLite]
- Error handling: Skip failed pages, log errors, continue scraping
- User-agent rotation (provide 5 common user agents)
- Respect robots.txt

Expected output: [NUMBER] records from [NUMBER] pages.

Debugging Prompts (96-105)

Prompt 96: Bug Diagnosis

I have a bug in my [LANGUAGE] code.

What should happen: [EXPECTED BEHAVIOR]

What actually happens: [ACTUAL BEHAVIOR]

When it happens: [STEPS TO REPRODUCE]

Here's the relevant code:

[PASTE CODE]

Error message (if any): [PASTE ERROR]

Diagnose the bug. Explain:

1. What's causing it (root cause, not just symptoms)
2. Why the code behaves this way
3. The fix (with corrected code)
4. How to prevent this type of bug in the future

Prompt 97: Error Message Decoder

I'm getting this error and I don't understand what it means:

[PASTE FULL ERROR MESSAGE / STACK TRACE]

Context:

- Language/framework: [LANGUAGE]
- What I was doing when it occurred: [ACTION]
- Has this worked before? [YES/NO]
- Recent changes: [WHAT I CHANGED BEFORE THE ERROR STARTED]

Explain:

1. What this error means in plain English
2. The most likely cause (given my context)
3. The fix
4. How to debug similar errors in the future

Prompt 98: Performance Optimization

This code is slow. It takes [TIME] to run when it should take [TARGET TIME].

[PASTE CODE]

Context:

- Data size: [HOW MUCH DATA IT PROCESSES]
- Where it runs: [BROWSER / NODE / PYTHON]
- Called how often: [ONCE / PER REQUEST / IN A LOOP]

Analyze:

1. Identify the performance bottleneck(s)
2. Explain WHY each bottleneck is slow (algorithmic complexity, I/O, memory, etc.)
3. Provide the optimized version with comments explaining each change
4. Estimate the speedup factor

Prompt 99: Memory Leak Detective

My [LANGUAGE] application's memory usage grows over time.

Symptoms:

- Memory at start: [SIZE]
- Memory after [TIMEFRAME]: [SIZE]
- When it's worst: [CONTEXT]

Here's the code I suspect is leaking:

[PASTE CODE]

Identify:

1. Where memory is being allocated but not freed
2. Common patterns that cause this type of leak
3. The fix
4. How to monitor memory usage to verify the fix worked (specific tools/commands)

Prompt 100: Code Review

Review this code for bugs, security issues, and improvements:

[PASTE CODE]

Focus on:

1. Bugs: Anything that will break in production
2. Security: SQL injection, XSS, exposed secrets, missing auth checks
3. Edge cases: What inputs will cause unexpected behavior?
4. Readability: Is this maintainable by someone else?
5. Performance: Any obvious inefficiencies?

For each issue, provide:

- Severity (CRITICAL / HIGH / MEDIUM / LOW)
- What's wrong
- The fix (show corrected code)

Prompt 101: Regex Builder

I need a regex that matches: [DESCRIBE WHAT YOU WANT TO MATCH]

Examples of strings that SHOULD match:

- [EXAMPLE 1]
- [EXAMPLE 2]
- [EXAMPLE 3]

Examples of strings that should NOT match:

- [EXAMPLE 1]
- [EXAMPLE 2]

Language: [JavaScript / Python / Go / etc.]

Provide:

1. The regex pattern
2. A breakdown of what each part does
3. Test code that validates all the examples above
4. Edge cases I should test for

Prompt 102: Refactor Legacy Code

Refactor this code to be cleaner and more maintainable:

[PASTE CODE]

Constraints:

- Don't change the external behavior (inputs and outputs stay the same)
- Keep the same language and framework
- Prioritize readability over cleverness
- [ANY SPECIFIC CONSTRAINTS – e.g., "keep the function signatures the

same"]

Show:

1. The refactored code
2. A summary of what changed and why
3. Before/after comparison of key metrics (lines of code, cyclomatic complexity, number of functions)

Prompt 103: Test Suite Generator

Write tests for this code:

[PASTE CODE]

Testing framework: [JEST / PYTEST / MOCHA / GO TEST / etc.]

Cover:

1. Happy path (normal usage, expected inputs)
2. Edge cases (empty inputs, null/undefined, boundary values)
3. Error cases (invalid inputs, network failures, missing data)
4. Integration (if the code interacts with external services, mock them)

Each test should have a descriptive name that explains what it's testing.

Generate at least [NUMBER] tests.

Prompt 104: Dependency Audit

Here's my package.json (or requirements.txt / Cargo.toml / go.mod):

[PASTE DEPENDENCY FILE]

Analyze:

1. Are any dependencies deprecated or unmaintained? (check last publish date)
2. Are there known security vulnerabilities?
3. Which dependencies can be removed (not needed or replaceable with built-in features)?
4. Which have lighter alternatives?
5. What's the total install size impact?

For each issue found, recommend a specific action (update, replace, remove).

Prompt 105: Git Mess Recovery

I'm in a bad git state. Here's what happened:

[DESCRIBE THE SITUATION – e.g., "I accidentally committed to main instead of a feature branch", "I need to undo the last 3 commits but

keep the code changes", "I have merge conflicts in 15 files"]

Current state:

- `git status` output: [PASTE]
- `git log --oneline -10` output: [PASTE]
- Branch I'm on: [BRANCH]
- Branch I should be on: [BRANCH]

Give me the exact git commands to fix this, in order. Explain each command before I run it. Flag any command that's destructive (can't be undone).

API & Integration Prompts (106-120)

Prompt 106: API Error Handling

Add comprehensive error handling to this API call:

[PASTE CODE WITH API CALL]

Handle these scenarios:

1. Network error (no internet)
2. Timeout (request takes too long – set timeout to [SECONDS])
3. 400 Bad Request (show the validation error from the API)
4. 401 Unauthorized (redirect to login / refresh token)
5. 403 Forbidden (show "insufficient permissions" message)
6. 404 Not Found (show "resource not found" message)
7. 429 Too Many Requests (retry after the specified delay)
8. 500 Internal Server Error (retry once, then show error message)

Each error should:

- Log the full error for debugging
- Show a user-friendly message (not the raw error)
- Not crash the application

Prompt 107: Environment Variable Setup

Set up environment variables for my [PROJECT TYPE] project.

I need these variables:

[LIST VARIABLES – e.g., "STRIPE_SECRET_KEY, DATABASE_URL, SENDGRID_API_KEY"]

Provide:

1. A .env.example file with placeholder values
2. A .gitignore entry to exclude .env
3. The code to load env vars in [LANGUAGE/Framework]
4. Validation that all required vars are set at startup (fail fast if missing)

5. Instructions for setting these in [PRODUCTION ENVIRONMENT – Netlify, Vercel, Railway, etc.]

Prompt 108: Webhook Handler

Build a webhook handler for [SERVICE – Stripe, GitHub, SendGrid, etc.] events.

Events I need to handle:

1. [EVENT 1]: [WHAT TO DO WHEN THIS FIRES]
2. [EVENT 2]: [WHAT TO DO WHEN THIS FIRES]
3. [EVENT 3]: [WHAT TO DO WHEN THIS FIRES]

Requirements:

- Verify webhook signature (prevent spoofed requests)
- Respond with 200 within 5 seconds (process async if needed)
- Idempotent handling (same event delivered twice = same result)
- Log every event received (timestamp, event type, relevant data)
- Error handling that doesn't expose internals to the caller

Runtime: [Node.js / Python / Go]

Framework: [Express / Netlify Functions / Vercel / Flask / etc.]

Prompt 109: OAuth Integration

Implement OAuth 2.0 login with [PROVIDER – Google, GitHub, Twitter, etc.].

Flow:

1. User clicks "Sign in with [PROVIDER]"
2. Redirect to provider's auth page
3. Provider redirects back with auth code
4. Exchange code for access token
5. Fetch user profile
6. Create or update user in my database
7. Set session/JWT and redirect to dashboard

Stack: [YOUR STACK]

Callback URL: [YOUR CALLBACK URL]

Include:

- Required scopes and why each is needed
- Where to get client ID and secret (link to provider's developer console)
- Token refresh logic
- What to store in the database (user ID, email, avatar, access token, refresh token)

Prompt 110: Data Migration Script

Write a migration script that transforms data from [FORMAT A] to [FORMAT B].

Source: [DESCRIBE SOURCE – CSV file, old database table, API response, etc.]

Destination: [DESCRIBE DESTINATION – new database table, JSON file, API endpoint, etc.]

Example source record:
[PASTE EXAMPLE]

Expected destination record:
[PASTE EXPECTED OUTPUT]

Transformations needed:

1. [TRANSFORMATION 1 – e.g., "split full_name into first_name and last_name"]
2. [TRANSFORMATION 2]
3. [TRANSFORMATION 3]

Requirements:

- Process in batches of [NUMBER] (don't load everything into memory)
- Log progress (every [NUMBER] records)
- Handle malformed records (skip + log, don't crash)
- Dry run mode (--dry-run flag that shows what would change without doing it)
- Rollback plan (how to undo if something goes wrong)

Prompt 111: Caching Layer

Add caching to this code to reduce [API CALLS / DATABASE QUERIES / COMPUTATION TIME]:

[PASTE CODE]

Cache strategy:

- Cache duration: [TIME – e.g., "5 minutes", "1 hour", "until manually invalidated"]
- Cache key: [HOW TO GENERATE THE KEY – e.g., "based on the request URL", "based on user ID + query"]
- Storage: [IN-MEMORY / REDIS / FILESYSTEM]
- Invalidation: [WHEN TO CLEAR THE CACHE]

Include:

- Cache hit/miss logging
- Fallback to source if cache is unavailable
- Cache warming (pre-populate on startup if applicable)

Prompt 112: File Upload Handler

Build a file upload feature for my [WEB APP / API].

Requirements:

- Accept: [FILE TYPES – e.g., "images only (jpg, png, webp)", "PDFs up to 10MB"]
- Max file size: [SIZE]
- Storage: [LOCAL FILESYSTEM / S3 / CLOUDFLARE R2]
- Generate unique filename (prevent overwrites)
- Return the file URL after upload

Security:

- Validate file type by magic bytes (not just extension)
- Scan filename for path traversal
- Set appropriate Content-Type headers
- Resize images to max [WIDTH]x[HEIGHT] if applicable

Frontend: Drag-and-drop zone + file picker + progress bar

Backend: [YOUR STACK]

Prompt 113: Search Implementation

Add search functionality to my app.

What users search for: [DESCRIBE THE DATA – e.g., "product names and descriptions", "blog post titles and content"]

Data size: [NUMBER OF RECORDS]

Search requirements:

- Fuzzy matching (typo tolerance)
- Results ranked by relevance
- Highlighted matching text in results
- Search-as-you-type (debounced, 300ms delay)

Implementation:

- If under 10K records: Client-side with Fuse.js
- If 10K–100K records: SQLite FTS5
- If 100K+ records: Meilisearch or Typesense (self-hosted, free)

Build the [APPROPRIATE OPTION] version. Include the search UI component with results dropdown.

Prompt 114: Email Sending Function

Build a function that sends emails from my app.

Service: [SENDGRID / RESEND / POSTMARK / SES]

API key location: Environment variable [VAR_NAME]

Email types I need:

1. [TYPE 1 – e.g., "Welcome email after signup"]

2. [TYPE 2 – e.g., "Password reset with link"]
3. [TYPE 3 – e.g., "Order confirmation with details"]

For each type, create:

- HTML template (inline CSS, responsive, matches [BRAND COLORS])
- Plain text fallback
- Function with proper parameters
- Error handling and retry logic

Include a test function that sends a sample email to verify setup.

Prompt 115: PDF Generator

Build a function that generates PDFs from data.

Use case: [WHAT THE PDF IS – invoice, report, certificate, resume, etc.]

Data inputs:

[LIST THE DATA FIELDS THAT GO INTO THE PDF]

Library: [Puppeteer for HTML-to-PDF / jsPDF for client-side / ReportLab for Python]

Requirements:

- Professional layout (header, body, footer with page numbers)
- Company logo placeholder
- Consistent fonts and spacing
- Table support (if applicable)
- Output: Save to file and/or return as buffer for download

Include a sample data object and the expected PDF layout description.

Prompt 116: Rate Limiter

Implement rate limiting for my API.

Strategy: [FIXED WINDOW / SLIDING WINDOW / TOKEN BUCKET]

Limit: [NUMBER] requests per [TIME PERIOD] per [IP / API KEY / USER ID]

Requirements:

- Return 429 Too Many Requests when limit exceeded
- Include Retry-After header
- Include X-RateLimit-Limit, X-RateLimit-Remaining, X-RateLimit-Reset headers
- Storage: [IN-MEMORY / REDIS]
- Exempt certain routes: [LIST ROUTES THAT SHOULDN'T BE LIMITED]
- Different limits for authenticated vs. unauthenticated users

Framework: [EXPRESS / FASTIFY / FLASK / etc.]

Prompt 117: Logging System

Set up structured logging for my [LANGUAGE] application.

Requirements:

- Log levels: DEBUG, INFO, WARN, ERROR
- JSON format in production, pretty-printed in development
- Include: timestamp, level, message, request ID (for tracing), duration (for performance)
- Write to stdout (for container/serverless environments)
- Sensitive data masking (mask emails, API keys, passwords in logs)

Library: [winston for Node.js / structlog for Python / zerolog for Go / pino for Node.js]

Include:

- Logger initialization code
- Middleware that logs every HTTP request (method, path, status code, duration)
- Example usage for each log level
- How to search logs in production (grep patterns or dashboard recommendations)

Prompt 118: Feature Flag System

Build a simple feature flag system for my app.

Requirements:

- Define flags in a JSON config file
- Check flags in code: `if (flags.isEnabled('new_checkout')) { ... }`
- Support flag types: boolean (on/off), percentage (roll out to X% of users), user list (enable for specific user IDs)
- Admin endpoint to toggle flags without redeployment
- Default to "off" if a flag doesn't exist

Storage: [JSON FILE / DATABASE / ENVIRONMENT VARIABLES]

Language: [LANGUAGE]

Include 5 example flags and the code to check them in different contexts (API route, UI component, background job).

Prompt 119: CI/CD Pipeline

Set up a CI/CD pipeline for my project using [GITHUB ACTIONS / GITLAB CI / etc.].

On every push to a feature branch:

1. Run linter
2. Run tests
3. Build the project
4. Deploy to preview environment

On merge to main:

1. All of the above
2. Deploy to production
3. Post deployment notification to [SLACK WEBHOOK URL / "console" for now]

Project type: [LANGUAGE/Framework]

Test command: [COMMAND]

Build command: [COMMAND]

Deploy target: [NETLIFY / VERCEL / AWS / etc.]

Include the YAML config file with comments explaining each step.

Prompt 120: Docker Setup

Dockerize my [LANGUAGE/Framework] application.

Application entry point: [FILE]

Dependencies: [PACKAGE MANAGER AND LOCKFILE]

Port: [PORT]

Environment variables needed: [LIST]

Provide:

1. Dockerfile (multi-stage build for smallest image size)
2. .dockerignore
3. docker-compose.yml (app + [ANY DEPENDENCIES – database, redis, etc.])
4. Commands to build, run, and stop

Optimize for:

- Image size (use alpine base images)
- Build speed (layer caching for dependencies)
- Security (non-root user, no unnecessary packages)
- Development experience (hot reload with volume mounts)

Section 4: Research — 40 Production Prompts

Market Research Prompts (121-135)

Prompt 121: Market Size Estimation

Estimate the market size for [PRODUCT/SERVICE].

I need:

1. TAM (Total Addressable Market): Everyone who could theoretically use this
2. SAM (Serviceable Addressable Market): The segment I can realistically reach
3. SOM (Serviceable Obtainable Market): What I can capture in Year 1

For each level, provide:

- The number of potential customers
- Average revenue per customer (based on my pricing: [PRICE])
- Total dollar value
- Your reasoning and data sources

My product: [DESCRIPTION]

My pricing: [PRICE MODEL]

My geographic focus: [REGION]

My target customer: [WHO]

Flag any assumptions you're making so I can validate them.

Prompt 122: Competitor Analysis Matrix

Analyze these competitors for my [PRODUCT/SERVICE]:

1. [COMPETITOR 1]
2. [COMPETITOR 2]
3. [COMPETITOR 3]
4. [COMPETITOR 4]
5. [COMPETITOR 5]

For each competitor, analyze:

- Pricing (exact plans, free tier details)
- Target customer (who they're optimized for)
- Key features (their top 5 selling points)
- Weakness (what customers complain about – check G2, Capterra, Reddit, Twitter)
- Distribution (how they acquire customers – SEO, ads, content, partnerships)
- Funding/size (bootstrapped vs. funded, team size if known)

Then provide:

- Feature gap matrix (what they all have vs. what's missing)
- The positioning white space (where NO competitor is strong)
- Recommended positioning for my product

Prompt 123: Customer Pain Point Discovery

I'm building [PRODUCT/SERVICE] for [TARGET AUDIENCE].

Research their pain points by analyzing:

1. What questions do they ask on Reddit? (suggest 5 relevant subreddits)

2. What do they complain about on Twitter? (suggest search queries)
3. What are the 1–2 star reviews saying about competitor products?
4. What "I wish there was a tool that..." posts exist?

For each pain point found, categorize:

- Severity (hair-on-fire / important / nice-to-have)
- Frequency (how often they encounter it)
- Current workaround (what they do today)
- Willingness to pay (would they pay to solve this?)

Give me 10 pain points ranked by "willingness to pay x frequency."

Prompt 124: ICP (Ideal Customer Profile)

Help me define my Ideal Customer Profile for [PRODUCT/SERVICE].

What I know so far:

- Product: [DESCRIPTION]
- Price: [PRICE]
- Current customers (if any): [BRIEF DESCRIPTION]

Build my ICP covering:

1. Demographics: Job title, company size, industry, revenue range
2. Psychographics: What they value, what they fear, what frustrates them
3. Behaviors: Where they hang out online, what they read, who they follow
4. Buying triggers: What event makes them start looking for a solution?
5. Objections: Top 3 reasons they'd say no and how to address each
6. Day-in-the-life: Describe a typical Tuesday for this person – where does my product fit?

Write it as a one-page profile I can reference when making product and marketing decisions.

Prompt 125: Pricing Research

Help me price [PRODUCT/SERVICE].

Context:

- What it does: [DESCRIPTION]
- Target customer: [WHO]
- Competitors and their pricing:
 - [COMPETITOR 1]: [THEIR PRICING]
 - [COMPETITOR 2]: [THEIR PRICING]
 - [COMPETITOR 3]: [THEIR PRICING]
- My costs per customer: [COST]
- My target margin: [PERCENTAGE]

Analyze:

1. What pricing model fits best? (one-time, subscription, usage-based, freemium, credits)
2. What price point maximizes revenue? (not just signups – revenue)
3. What's the psychological anchoring strategy? (show a high price first, then my price)
4. Should I offer tiers? If yes, design 3 tiers with specific feature gates
5. What's the minimum viable price I can charge and still attract serious users? (too cheap = perceived as low quality)

Give me a pricing page mockup (text description of what each tier shows).

Prompt 126: Niche Validation

I want to enter the [NICHE] market with [PRODUCT/SERVICE].

Validate this niche by answering:

1. Size: How many potential customers exist? (estimate with reasoning)
2. Growth: Is this market growing or shrinking? What's the trend?
3. Willingness to pay: Are people in this niche spending money on solutions? (provide examples)
4. Accessibility: Can I reach these customers without a large budget? (where do they congregate online?)
5. Competition: How crowded is it? Who are the top 3 players?
6. Defensibility: If I succeed, can someone easily copy me?

Score each dimension 1–5 and give an overall GO / CONDITIONAL / NO-GO recommendation with reasoning.

Prompt 127: Trend Analysis

Analyze the trend trajectory for [TOPIC/INDUSTRY/TECHNOLOGY].

Provide:

1. Timeline: Key milestones in the last 3 years
2. Current state: Where is this trend right now? (early adopter, early majority, late majority, declining)
3. Growth indicators: What signals suggest this is growing? (search volume, funding, job postings, conference talks)
4. Decline indicators: What signals suggest this might be peaking?
5. Adjacent trends: What related trends are emerging?
6. Prediction: Where will this be in 12 months? In 3 years?
7. Action: What should I build/do NOW to capitalize on this trend before it's saturated?

Be specific – name companies, products, and people driving this trend.

Prompt 128: Reddit Research Scrape

I'm researching [TOPIC] on Reddit. Help me extract insights.

Subreddits to analyze:

- r/[SUBREDDIT 1]
- r/[SUBREDDIT 2]
- r/[SUBREDDIT 3]

Search queries to use:

- [QUERY 1]
- [QUERY 2]
- [QUERY 3]

For each subreddit, identify:

1. Top 5 recurring questions/complaints
2. Tools/products people recommend (and which they trash)
3. Advice that gets heavily upvoted (this is what the community values)
4. Gaps – problems people describe that have no good solution
5. Language patterns – exact phrases people use to describe their problems (use these in marketing copy)

Format as a research brief I can reference when writing landing pages and ads.

Prompt 129: SWOT Analysis

Perform a SWOT analysis for [MY BUSINESS/PRODUCT].

Context:

- What I'm building: [DESCRIPTION]
- My background/resources: [WHAT I BRING]
- My market: [TARGET MARKET]
- My competitors: [TOP 3 COMPETITORS]

For each quadrant, provide 5 specific points (not generic):

Strengths: What specific advantages do I have?

Weaknesses: What specific limitations will hold me back?

Opportunities: What specific market gaps or trends can I exploit?

Threats: What specific risks could kill this?

For each weakness and threat, suggest a specific mitigation strategy.

End with: "The single biggest opportunity here is _____ because _____."

Prompt 130: Feature Prioritization

Help me prioritize these features for my [PRODUCT]:

[LIST 10–15 FEATURES YOU'RE CONSIDERING]

For each feature, score (1–5):

1. Impact: How much does this move the needle for users?
2. Effort: How long to build? (1 = day, 5 = month+)
3. Revenue: Does this directly lead to revenue?
4. Retention: Does this keep existing users coming back?
5. Differentiation: Does this set us apart from competitors?

Calculate: $\text{Impact} \times \text{Revenue} \times \text{Retention} \times \text{Differentiation} / \text{Effort} = \text{Priority Score}$

Return a sorted list (highest priority first) with the score breakdown.

Include a "Must Build Now" (top 3), "Build Next" (next 3), and "Backlog" (rest) categorization.

Prompt 131: Go-To-Market Plan

Create a go-to-market plan for [PRODUCT] launching on [DATE].

Product: [DESCRIPTION]

Price: [PRICE]

Target customer: [WHO]

Budget: [AMOUNT or "\$0 – organic only"]

Goal: [FIRST MONTH TARGET – users, revenue, signups]

Cover these phases:

Pre-launch (2 weeks before):

- Where to build anticipation
- What content to create
- Who to reach out to
- Email list strategy

Launch day:

- Exactly what to post, where, and when
- Product Hunt launch plan (if applicable)
- Outreach messages to send

Post-launch (weeks 1–4):

- Content calendar
- Community engagement plan
- Feedback collection system
- Iteration priorities based on early data

For each action item, specify: platform, timing, content type, and expected outcome.

Prompt 132: Survey Design

Design a customer research survey for [PURPOSE – e.g., "understanding why users churn", "validating a new feature idea", "pricing research"].

Requirements:

- Max 8 questions (completion rate drops after 8)
- Mix of question types: multiple choice, rating scale, one open-ended
- No leading questions (questions that suggest the "right" answer)
- Progressive disclosure (easy questions first, harder/personal ones last)
- Each question has a specific hypothesis it's testing

For each question, provide:

- The question text
- Answer options (if applicable)
- What hypothesis this tests
- What action I'll take based on each possible answer

Also provide:

- Where to distribute the survey ([SUGGEST CHANNELS])
- How many responses I need for statistically meaningful results
- Incentive recommendation (if needed)

Prompt 133: Unit Economics Analysis

Calculate the unit economics for my [BUSINESS MODEL].

Inputs:

- Price: [WHAT I CHARGE]
- COGS per customer: [DIRECT COSTS – hosting, API calls, support time, etc.]
- CAC (Customer Acquisition Cost): [HOW MUCH IT COSTS TO GET ONE CUSTOMER – or "unknown, estimate for me"]
- Churn rate: [MONTHLY CHURN – or "unknown, use industry average for [INDUSTRY]"]
- Expansion revenue: [DO EXISTING CUSTOMERS BUY MORE OVER TIME?]

Calculate:

1. Gross margin per customer
2. LTV (Lifetime Value)
3. LTV:CAC ratio (healthy = 3:1 or higher)
4. Months to payback CAC
5. Break-even point (how many customers to cover fixed costs of [AMOUNT])

If LTV:CAC is below 3:1, suggest specific levers to improve it (reduce CAC, increase price, reduce churn, increase expansion revenue).

Prompt 134: Keyword Research Brief

Perform keyword research for [NICHE/TOPIC].

I need keywords for:

1. Blog content (informational intent)
2. Landing pages (commercial/transactional intent)
3. Comparison pages ("[product] vs [product]" and "[product] alternatives")

For each keyword, estimate:

- Monthly search volume (low/medium/high if exact numbers unavailable)
- Competition level (low/medium/high)
- Content type that ranks (blog post, tool, directory, video)
- Suggested title for my content

Provide:

- 10 head terms (broad, high volume)
- 20 long-tail terms (specific, lower volume, easier to rank)
- 5 "zero-competition" terms (questions nobody's answering well)
- 5 trending terms (growing search volume)

My domain authority is [LOW/MEDIUM/HIGH or "new site"]. Prioritize keywords I can realistically rank for.

Prompt 135: Market Report Summary

I'm going to paste a market report / research article / data dump. Summarize it for actionable use.

[PASTE THE CONTENT]

Extract:

1. The 5 most important data points (with exact numbers)
2. Trends that affect my business: [DESCRIBE YOUR BUSINESS]
3. Threats I should prepare for
4. Opportunities I should act on this month
5. Predictions for the next 6-12 months

Format as a one-page brief with bullet points. No filler. Every sentence should contain a fact, number, or actionable insight.

End with: "The one thing I should do based on this report is: ____"

Competitor Analysis Prompts (136-145)

Prompt 136: Competitor Website Teardown

Analyze [COMPETITOR URL] as if you're a conversion rate optimizer.

Evaluate:

1. Hero section: Is the value proposition clear in 5 seconds?
2. Social proof: What proof elements do they use? (testimonials, logos, numbers)
3. CTA strategy: How many CTAs? What do they say? Where are they placed?
4. Pricing page: How do they present pricing? What's the anchoring strategy?
5. Objection handling: Do they address common objections? (FAQ, guarantees, comparisons)
6. Trust signals: SSL, money-back guarantee, press logos, certifications

For each element, rate it (WEAK / AVERAGE / STRONG) and explain why. Then: What can I steal (ethically) for my own landing page?

Prompt 137: Competitor Content Audit

Analyze the content strategy of [COMPETITOR].

Look at:

1. Blog: What topics do they cover? How often do they publish? What's their top-performing post (highest social shares)?
2. Social media: Which platforms are they active on? What content types get the most engagement?
3. Email: Sign up for their newsletter. What's the welcome sequence like? How often do they email?
4. YouTube/Podcast: Do they have video/audio content? What topics get the most views?

Provide:

- Content gaps I can exploit (topics they're NOT covering)
- Content formats they're not using (that work well in this niche)
- Their estimated content budget/effort level
- The one piece of content I should create first to compete with them

Prompt 138: Competitor Pricing Breakdown

Break down the pricing strategy of these competitors:

[LIST 3-5 COMPETITORS WITH THEIR PRICING PAGES]

For each:

1. Pricing model (per seat, per usage, flat rate, etc.)
2. Free tier limitations (what's free vs. what's not)
3. Price anchoring (how they make the mid-tier look attractive)
4. Enterprise pricing (custom/sales-led or self-serve?)
5. Discounts visible (annual vs. monthly difference, promo codes)
6. Hidden costs (add-ons, overage fees, required upgrades)

Analysis:

- Where's the pricing gap I can position in?
- What pricing model would disrupt this market?
- What's the price sensitivity of this customer segment?

Prompt 139: Competitor Review Mining

Analyze reviews for [COMPETITOR] from these sources:

- G2 / Capterra / TrustPilot
- App Store / Play Store
- Reddit mentions
- Twitter mentions

For each source, extract:

1. Top 3 things users LOVE (these are table-stakes features I must have)
2. Top 3 things users HATE (these are my differentiation opportunities)
3. Feature requests that appear 3+ times (unmet demand)
4. Switching triggers (what makes people leave this competitor)
5. Exact quotes I can use in my marketing ("Unlike [competitor], we...")

Compile a "Competitor Weakness Report" – a list of their biggest vulnerabilities ranked by frequency of complaint.

Prompt 140: Competitive Positioning Map

Create a competitive positioning map for [MY PRODUCT] vs. competitors.

Competitors:

1. [COMPETITOR 1]
2. [COMPETITOR 2]
3. [COMPETITOR 3]
4. [COMPETITOR 4]

Choose the two most important axes for my customers:

- Axis options: price (low/high), complexity (simple/powerful), audience (SMB/enterprise), speed (fast/slow), support (self-serve/high-touch), design (functional/beautiful)

Place each competitor on the 2x2 grid. Identify the empty quadrant – that's my positioning opportunity.

Then write:

1. My positioning statement: "For [AUDIENCE] who [NEED], [MY PRODUCT] is the [CATEGORY] that [DIFFERENTIATOR], unlike [COMPETITOR] which [LIMITATION]."
2. My tagline (under 8 words)
3. My 3 key differentiators (specific, not generic)

Prompt 141: Competitor Ad Analysis

Analyze the advertising strategy of [COMPETITOR].

Research:

1. Facebook Ad Library: What ads are they running? What's the messaging? What landing pages do they use?
2. Google Ads: What keywords are they bidding on? (Use SpyFu free tier or SEMrush free trial)
3. Sponsorships: What podcasts, newsletters, or YouTube channels do they sponsor?

For each ad/channel:

- What's the hook? (first line or headline)
- What's the CTA?
- What audience are they targeting?
- Estimated spend level (low/medium/high)

Provide:

- Which of their ad strategies I should copy (and improve)
- Which I should avoid (and why)
- 3 ad angles they're NOT using that would work for my product

Prompt 142: Technology Stack Analysis

Analyze the technology stack of [COMPETITOR WEBSITE URL].

Check using BuiltWith, Wappalyzer, or similar:

1. Frontend framework
2. Backend/hosting provider
3. Analytics tools
4. Marketing tools (email, CRM, chat)
5. Payment processor
6. CDN
7. Third-party integrations

Then assess:

- What does their tech stack tell me about their priorities?
- Where are they over-engineered? (using enterprise tools for a simple product)
- Where are they under-invested? (no analytics, basic email tool)
- What can I infer about their team size and budget?
- Technology gaps I can exploit (they're slow, they don't have mobile support, etc.)

Prompt 143: Competitor Social Media Audit

Audit the social media presence of [COMPETITOR] across:

- Twitter: follower count, post frequency, engagement rate, content types
- LinkedIn: company page followers, post frequency, employee advocacy

- YouTube: subscriber count, average views, video topics
- TikTok: if present, what content style

For each platform:

1. What content gets the most engagement?
2. What content gets ignored?
3. How do they interact with comments/replies?
4. What's their posting schedule?
5. Do they use paid promotion on their organic posts?

Provide:

- Platform-by-platform comparison vs. my current presence
- Quick wins: things I can start doing tomorrow that they're not doing
- Content ideas inspired by their best-performing posts (differentiated, not copied)

Prompt 144: Market Landscape Summary

Give me a comprehensive market landscape for [INDUSTRY/NICHE].

Include:

1. Major players (top 5 by market share or revenue)
2. Rising challengers (companies growing fast in the last 12 months)
3. Recent acquisitions or mergers
4. Funding rounds in the last year (who raised, how much, at what stage)
5. Regulatory changes or upcoming regulations
6. Technology shifts affecting the market
7. Customer behavior changes (how buying patterns are shifting)

Present this as a 2-page market brief with sections, bullet points, and a "So What?" interpretation after each section explaining what it means for a new entrant.

Prompt 145: Competitor Onboarding Flow Analysis

Walk through [COMPETITOR]'s onboarding flow as a new user and analyze it.

Document every step:

1. Sign up page: What information do they ask for? Social login options?
2. Email verification: Required or optional?
3. Onboarding questionnaire: What questions do they ask? How do they use the answers?
4. First-run experience: What's the FIRST thing they get you to do?
5. Empty states: How do they handle screens with no data?
6. Activation moment: What's the "aha moment" they're driving toward?
7. Upgrade prompts: When and how do they first show pricing?

Rate each step (FRICTION: high/medium/low) and (VALUE:

high/medium/low).

Then suggest: How should MY onboarding flow be different? What can I do in fewer steps?

Alpha Extraction Prompts (146-160)

Prompt 146: Arbitrage Opportunity Finder

Identify arbitrage opportunities in [MARKET/NICHE].

An arbitrage is: something you can buy/get cheaply in one place and sell/use at a higher value somewhere else.

Categories to explore:

1. Skills arbitrage: What skills are cheap to acquire but command high rates?
2. Geographic arbitrage: What's expensive in [MARKET A] but cheap in [MARKET B]?
3. Platform arbitrage: What content/products perform on [PLATFORM A] but nobody's doing on [PLATFORM B]?
4. Time arbitrage: What's becoming valuable that most people haven't noticed yet?
5. Information arbitrage: What do experts know that the general market doesn't?

For each opportunity:

- Effort to exploit (hours/dollars)
- Expected return
- Window of opportunity (how long before this closes)
- Risk level

Prompt 147: Trend Monetization

[TREND] is growing fast right now.

Give me 10 specific ways to monetize this trend, ordered by speed-to-revenue:

For each:

1. What to sell (product, service, content, tool)
2. Who buys it (specific buyer persona)
3. How to reach them (channel)
4. Price point
5. Time to first dollar
6. Scalability (1-5)
7. Moat / defensibility (1-5)

Trend: [DESCRIBE THE TREND WITH SPECIFICS]

My skills: [WHAT I CAN DO]

My budget: [AMOUNT]

Prompt 148: Revenue Reverse Engineering

[COMPANY/PERSON] appears to be making \$[AMOUNT]/month.

Reverse engineer their revenue model:

1. What are all their revenue streams? (products, services, affiliates, ads, sponsorships)
2. Estimated revenue per stream (based on public data: pricing, audience size, engagement)
3. Cost structure (team size, tools, hosting, content production)
4. Estimated profit margin
5. Growth rate (are they growing or plateauing?)

Show your math. Use public data: social media followings, pricing pages, job postings, app store rankings, SimilarWeb estimates.

Then: Which of their revenue streams could I replicate with my resources?

Prompt 149: Distribution Channel Analysis

What are the best distribution channels for [PRODUCT/SERVICE] targeting [AUDIENCE]?

Analyze these channels:

1. SEO / Organic search
2. Twitter / X
3. Reddit
4. LinkedIn
5. Product Hunt
6. YouTube
7. TikTok
8. Newsletters (sponsoring others')
9. Communities (Slack, Discord)
10. Partnerships / Affiliates
11. Cold outreach
12. Paid ads (Google, Meta, Reddit)

For each channel, provide:

- Relevance to my audience (LOW / MEDIUM / HIGH)
- Cost (\$0 / \$ / \$\$ / \$\$\$)
- Time to results (DAYS / WEEKS / MONTHS)
- Effort required (LOW / MEDIUM / HIGH)
- Expected CAC range
- Example of someone in my niche who uses this channel well

Rank the top 5 channels I should focus on first, given a [BUDGET] budget and [TIMEFRAME] timeline.

Prompt 150: Micro-SaaS Idea Generator

Generate 10 micro-SaaS ideas based on these constraints:

- Solo founder (just me)
- Budget: under \$[AMOUNT] to build
- Must be profitable within 3 months
- Monthly revenue target: \$[AMOUNT]
- My skills: [LIST YOUR SKILLS]
- Industries I know well: [LIST INDUSTRIES]

For each idea:

1. Product name + one-line description
2. Target customer (specific)
3. Problem it solves (specific)
4. How it makes money (pricing model + price point)
5. Tech stack to build it
6. Time to MVP (hours)
7. How to get first 10 customers
8. Existing competitors and why there's room for one more
9. Moat after 12 months (what makes it hard to copy)

Rank by: (potential revenue / effort to build) ratio. Highest first.

Prompt 151: Underserved Audience Finder

Find underserved audiences in [BROAD MARKET].

An underserved audience is: a group with specific needs that current products/services don't fully address, AND who have money to spend.

For each audience found:

1. Who they are (demographics + psychographics)
2. What they need that doesn't exist (or exists poorly)
3. Where they hang out (online and offline)
4. How much they spend annually on related products
5. Why the market ignores them (too small? too niche? too hard to reach?)
6. Product/service idea tailored to them
7. Estimated market size (number of people x willingness to pay)

Find at least 5 underserved audiences. Rank by "ease of serving x willingness to pay."

Prompt 152: Content Opportunity Gap

Find content gaps in [NICHE] – topics with high demand and low supply.

Method:

1. Search for [NICHE]-related questions on Quora, Reddit, and Google's "People Also Ask"

2. Find questions with many upvotes but bad answers
3. Find keywords where the top-ranking content is thin, outdated, or unhelpful
4. Find topics where forums have threads but no definitive blog post exists

For each gap:

- The question/topic
- Current best answer (and why it's insufficient)
- Estimated search volume (if applicable)
- Content format that would win (blog post, video, tool, template)
- Difficulty to create (1-5)
- Monetization angle (how to make money from this content)

Give me 10 gaps ranked by "search demand / difficulty to create."

Prompt 153: Partnership Opportunity Map

Map potential partnership opportunities for [MY BUSINESS].

Categories:

1. Complementary products (they serve my customer with a non-competing product)
2. Distribution partners (they have access to my target audience)
3. Technology integrations (connecting my product to theirs adds value for both)
4. Content collaborations (co-created content that reaches both audiences)
5. Affiliate/referral (they earn by sending me customers, or vice versa)

For each opportunity:

- Company/person name
- What they do
- Why the partnership makes sense for THEM (not just me)
- Specific partnership format (integration, co-webinar, bundle, affiliate, etc.)
- How to approach them (warm intro path, cold email, Twitter DM)
- Expected outcome

Find at least 10 potential partners across the 5 categories.

Prompt 154: Pricing Experiment Design

Design a pricing experiment for [PRODUCT].

Current pricing: [CURRENT PRICE AND MODEL]

Hypothesis: [WHAT I THINK WILL HAPPEN – e.g., "raising price from \$9 to \$19 won't significantly reduce conversion"]

Experiment design:

1. What to test (price, packaging, tier structure, trial length, etc.)
2. Control group vs. test group split
3. Sample size needed for statistical significance
4. Duration of test
5. Primary metric to measure (conversion rate, revenue per visitor, etc.)
6. Secondary metrics to watch
7. How to implement (A/B test tool recommendation, or manual split)
8. Decision criteria: "If [METRIC] is above [THRESHOLD], we go with the new pricing"

Also: What could go wrong with this experiment? How do I avoid false positives?

Prompt 155: Revenue Diversification

I currently make money from [CURRENT REVENUE STREAM]. Help me diversify.

My business: [DESCRIPTION]
Current revenue: \$[AMOUNT]/month
My audience: [SIZE AND DESCRIPTION]
My content/assets: [WHAT I'VE ALREADY BUILT]

Suggest 5 additional revenue streams I can add without:

- Requiring significant new skills
- Needing more than 10 hours/month to maintain
- Diluting my core business

For each:

1. What it is
2. How it generates revenue
3. Expected monthly revenue (conservative estimate)
4. Setup time (hours)
5. Ongoing time commitment
6. How it leverages what I already have (audience, content, expertise, code)
7. Risk if it cannibalizes my main revenue

Rank by revenue-to-effort ratio.

Prompt 156: Emerging Technology Assessment

Assess [TECHNOLOGY] for business applications.

Current state:

1. What can it do TODAY (not in theory – actual, deployed use cases)?
2. What can't it do yet?
3. Who's using it in production? (name companies and products)
4. What does it cost? (APIs, hosting, licensing)

Business applications:

5. Top 5 business problems this technology solves
6. Which industries are adopting fastest?
7. Where is there the most money to be made?
8. What's the window of opportunity? (how long before this is commoditized?)

For a solopreneur with [MY SKILLS]:

9. What product could I build with this technology in the next 30 days?
10. What's the realistic revenue potential in the first 6 months?
11. What skills do I need to learn? (with specific learning resources)

Prompt 157: Customer Interview Script

Write a customer interview script for [PURPOSE – e.g., "understanding how they choose a CRM", "validating a new feature idea"].

Interview length: 30 minutes

Interviewee: [CUSTOMER TYPE]

Script structure:

1. Warm-up (2 min): Build rapport, explain the purpose
2. Background (5 min): Understand their role and context
3. Problem exploration (10 min): Dig into their pain points
4. Solution exploration (8 min): How they solve the problem today
5. Reaction to concept (3 min): Show [MY IDEA] and get honest feedback
6. Wrap-up (2 min): Ask for referrals, thank them

For each section, provide:

- Exact questions to ask
- Follow-up probes for common responses
- What to listen for (signals vs. noise)
- Red flags (signs they're being polite instead of honest)

Rules: No leading questions. No "would you use this?" (everyone says yes). Focus on behavior, not opinions.

Prompt 158: Supply/Demand Imbalance Finder

Find supply/demand imbalances I can exploit in [MARKET].

A supply/demand imbalance is: high demand + low supply = opportunity, or low demand + high supply = avoid.

Look for:

1. Services where demand outstrips supply (long wait times, high prices, poor quality)
2. Products where demand is growing faster than new competitors are entering
3. Content topics where search volume is rising but good content is

scarce

4. Skills where job postings outnumber qualified candidates
5. Markets where technology has changed demand but supply hasn't adapted

For each imbalance:

- Evidence (data, trends, anecdotes)
- How to position myself to capture value
- Timeline before the gap closes
- Capital required

Prompt 159: Audience Overlap Analysis

Find audiences adjacent to [MY CURRENT AUDIENCE] that I could expand into.

My current audience: [DESCRIPTION – who they are, what they care about]

My product: [WHAT I SELL]

For each adjacent audience:

1. Who they are
2. What they share with my current audience (overlap)
3. What's different (unique needs/pain points)
4. How I'd need to adapt my product/messaging
5. Where to find them
6. Estimated size vs. my current audience
7. Revenue potential

Find 5 adjacent audiences. Rank by: (overlap with current audience x willingness to pay x ease of reaching).

Prompt 160: Alpha Signal Detection

I want to detect weak signals that predict [MARKET/NICHE] trends before they go mainstream.

Signal sources to monitor:

1. Patent filings (what are companies protecting?)
2. Job postings (what roles are companies suddenly hiring for?)
3. Academic papers (what research is about to commercialize?)
4. Regulatory filings (what's about to be approved/banned?)
5. Venture capital (what are VCs funding that hasn't hit the press?)
6. Developer activity (what open-source repos are suddenly popular?)
7. Community chatter (what are early adopters talking about?)

For each signal type:

- Where exactly to monitor it (specific URLs, tools, RSS feeds)
- How to filter noise from signal
- How far ahead this signal typically predicts the trend
- Example of a past trend this would have caught early

Give me a weekly monitoring checklist I can follow in 30 minutes.

Section 5: Business Strategy — 40

Production Prompts

Pricing & Positioning Prompts (161-175)

Prompt 161: Value-Based Pricing Calculator

Help me set a value-based price for [PRODUCT/SERVICE].

What my customer gets:

- Time saved: [HOURS PER WEEK/MONTH]
- Money saved: [\$AMOUNT PER MONTH]
- Revenue generated: [\$AMOUNT PER MONTH]
- Risk reduced: [WHAT RISK AND ESTIMATED COST IF IT HAPPENS]

Their current alternative: [WHAT THEY DO NOW AND WHAT IT COSTS]

Calculate:

1. Total value delivered per month (quantified in dollars)
2. Recommended price at 10% of value delivered (standard value-based pricing)
3. Price range: "floor" (minimum viable) to "ceiling" (maximum the market bears)
4. How to frame the price in terms of ROI ("pays for itself in X days")
5. Pricing objection responses for: "too expensive," "competitor is cheaper," "can I get a discount?"

Prompt 162: Positioning Statement Generator

Create a positioning statement for [PRODUCT/SERVICE].

Framework: "For [TARGET CUSTOMER] who [NEED/PAIN], [PRODUCT] is the [CATEGORY] that [KEY BENEFIT], unlike [COMPETITOR/ALTERNATIVE] which [COMPETITOR LIMITATION]."

Inputs:

- Target customer: [WHO – be specific]
- Their main need: [PAIN POINT]
- My product: [NAME]
- Category: [WHAT TYPE OF PRODUCT IS THIS]
- Key benefit: [THE ONE THING THAT MATTERS MOST]
- Main competitor: [WHO]

- Their limitation: [WHAT THEY DO POORLY]

Generate:

1. The positioning statement (following the framework above)
2. A 5-word tagline derived from the positioning
3. An elevator pitch (30 seconds, spoken – not written)
4. A one-paragraph product description for the website
5. Three headlines for the landing page hero section (test all three)

Prompt 163: Pricing Page Design

Design a pricing page for [PRODUCT] with [2/3/4] tiers.

For each tier, I need:

- Tier name (psychology matters – don't use Bronze/Silver/Gold)
- Price
- Feature list (what's included and what's NOT included)
- CTA button text
- Who this tier is for (one sentence)

My product features:

[LIST ALL FEATURES]

Pricing goals:

- Anchor on the [MIDDLE/HIGHEST] tier
- Most customers should choose the [TIER] tier
- Free tier should create FOMO, not satisfy needs

Also provide:

- FAQ section (6 questions, focus on objection-handling)
- Annual vs. monthly pricing toggle (what discount for annual?)
- Social proof to place on the pricing page (what kind, where)
- "Not sure which plan?" comparison table

Prompt 164: Freemium Strategy Design

Design a freemium strategy for [PRODUCT].

All features: [LIST EVERY FEATURE]

Decide which features go where:

Free tier:

- Must include: enough value that users keep the product
- Must exclude: enough value that power users NEED to upgrade
- Usage limits: [SUGGEST LIMITS – e.g., "3 projects," "100 API calls/month"]

Paid tier (\$[PRICE]):

- The "unlock" that justifies the price
- The emotional trigger for upgrading (what moment makes someone say

"I need this")

Rules:

- Free tier users must be able to experience the core value within 5 minutes
- The free-to-paid upgrade path must feel natural, not forced
- The limit should hit when users are MOST engaged (not when they're still evaluating)

Include the upgrade modal copy: headline, 3 bullet points, CTA button text, and a one-line objection handler.

Prompt 165: Price Increase Communication

Write an email announcing a price increase for [PRODUCT].

Current price: \$[CURRENT]

New price: \$[NEW]

Effective date: [DATE]

Existing customer treatment: [GRANDFATHERED / GRACE PERIOD / IMMEDIATE]

The email must:

- Lead with what's been added/improved (justify the increase)
- State the new pricing clearly
- Explain what existing customers get (grandfather clause, discount, etc.)
- Not apologize for the increase
- Be under 200 words
- Include a CTA for questions (support email, not "call us")

Also write:

- The FAQ for the pricing page update
- A tweet announcing the change
- A response template for customers who complain

Prompt 166: Bundle Strategy

Design product bundles for my offerings:

Individual products:

1. [PRODUCT 1] - \$[PRICE]
2. [PRODUCT 2] - \$[PRICE]
3. [PRODUCT 3] - \$[PRICE]
4. [PRODUCT 4] - \$[PRICE]

Create:

1. A "starter" bundle (2 products, [X]% discount)
2. A "complete" bundle (all products, [X]% discount)
3. A limited-time bundle with urgency element

For each bundle:

- Name
- What's included
- Individual value (sum of parts)
- Bundle price
- Savings highlighted
- Who it's for
- Landing page headline
- One-paragraph description

Also: Which product should be the "gateway" product (cheapest, most broadly useful) that leads to bundle upsells?

Prompt 167: Competitive Pricing Response

A competitor just [LOWERED THEIR PRICE / LAUNCHED A FREE TIER / UNDERCUT ME].

Their move: [DESCRIBE WHAT THEY DID]

My current pricing: [MY PRICING]

My differentiation: [WHAT MAKES ME DIFFERENT]

My customer base: [SIZE AND LOYALTY LEVEL]

Analyze:

1. Should I match their price? (pros/cons)
2. Should I differentiate further instead? (how?)
3. Should I add value to justify my current price? (what to add?)
4. Should I create a new tier to compete at their price point?
5. How do I communicate this to current customers who might ask?

Give me a specific recommendation with action steps and messaging.

Prompt 168: Discount Strategy

Design a discount strategy for [PRODUCT/SERVICE].

Rules I want to follow:

- Never discount the core product (it devalues the brand)
- Discounts should create urgency, not expectation
- Every discount must have a clear business goal

Create discount strategies for these scenarios:

1. Black Friday / seasonal sale
2. First-time customer incentive
3. Annual plan promotion
4. Win-back churned customers
5. Referral reward

For each:

- Discount amount/type (%, fixed amount, added value, extended trial)
- Duration

- How to communicate it (email subject, landing page headline)
- Tracking: how to measure if the discount increased revenue (not just signups)
- Exit strategy: how to stop the discount without losing momentum

Prompt 169: Loss Leader Strategy

Design a loss leader strategy for my business.

My products/services:

[LIST ALL OFFERINGS WITH PRICES AND MARGINS]

A loss leader is a product sold at or below cost to attract customers who then buy higher-margin products.

Questions to answer:

1. Which product should be the loss leader? (criteria: low cost to deliver, high perceived value, naturally leads to upsell)
2. What should I charge for it? (\$0? \$1? Below cost?)
3. What's the upsell path from the loss leader to my core offering?
4. What conversion rate do I need from loss leader buyer to core product buyer to break even?
5. How do I prevent people from buying ONLY the loss leader?

Provide the math: If I sell [X] loss leaders at \$[PRICE] and [Y]% convert to \$[CORE PRODUCT PRICE], my net revenue is \$[CALCULATE].

Prompt 170: Launch Pricing Strategy

Design a launch pricing strategy for [NEW PRODUCT].

Regular price after launch: \$[PRICE]

Launch date: [DATE]

Launch duration: [DAYS]

Email list size: [NUMBER]

Social following: [NUMBER]

Create a pricing sequence:

Pre-launch:

- Early bird price (and how to frame it)
- Limit or deadline (what creates urgency)
- What early buyers get that later buyers don't

Launch week:

- Launch price vs. regular price
- Day-by-day urgency escalation
- Price increase triggers (time-based, quantity-based, or both)

Post-launch:

- How/when to raise to full price

– Evergreen urgency strategies (without fake scarcity)

Include the email subject lines for each phase (pre-launch tease, launch day, mid-launch reminder, last chance).

Prompt 171: Upsell / Cross-Sell Map

Map all upsell and cross-sell opportunities in my business.

My products/services:

1. [PRODUCT 1] – \$[PRICE] – [BRIEF DESCRIPTION]
 2. [PRODUCT 2] – \$[PRICE] – [BRIEF DESCRIPTION]
 3. [PRODUCT 3] – \$[PRICE] – [BRIEF DESCRIPTION]
- [ADD MORE IF APPLICABLE]

For each product, identify:

1. Upsell: What higher-priced version could I offer? (premium, done-for-you, expanded)
2. Cross-sell: What other product in my catalog pairs with this?
3. Add-on: What small addition (\$5-\$20) could I offer at checkout?
4. Timing: WHEN should I present the upsell? (checkout, 7 days later, after a milestone)
5. Messaging: The one-line pitch for each upsell

Calculate: If [X]% of buyers accept the upsell at \$[PRICE], my average order value goes from \$[CURRENT] to \$[NEW].

Prompt 172: Money-Back Guarantee Design

Design a money-back guarantee for [PRODUCT/SERVICE].

Product type: [DIGITAL PRODUCT / SAAS / SERVICE / PHYSICAL]

Price: \$[PRICE]

Current refund rate: [PERCENTAGE or "unknown"]

Industry average refund rate: [IF KNOWN]

Design:

1. Guarantee type: (30-day no-questions / results-based / conditional)
2. Guarantee copy: The exact text for the sales page (specific, not generic)
3. Refund process: How customers request a refund (make it easy – friction = chargebacks)
4. Anti-abuse measures: How to prevent people from using the product and then refunding
5. Guarantee as a selling point: How to position the guarantee in marketing (it's a conversion tool, not just a safety net)

Also: What guarantee would make someone who's 80% convinced tip to 100%? Write that version.

Prompt 173: Lifetime Deal Strategy

Should I offer a lifetime deal for [PRODUCT]?

My product: [DESCRIPTION]

Monthly price: \$[PRICE]

Average customer lifetime: [MONTHS]

Monthly cost to serve one user: \$[COST]

Current MRR: \$[AMOUNT]

Cash needed for: [WHY I MIGHT WANT CASH NOW – hiring, development, runway]

Analyze:

1. LTD price calculation: If average lifetime is [X] months, what LTD price captures the same LTV?
2. Risk: What if LTD users stick around for 5+ years? Cost projection.
3. Platform options: AppSumo (they take 50–70%), own website, Dealify, StackSocial
4. LTD-specific tier: What features to include/exclude for LTD buyers?
5. Cap: How many LTDs to sell before stopping?
6. Communication: How to tell existing monthly subscribers about the LTD without upsetting them

Recommendation: GO / CONDITIONAL / NO-GO with specific reasoning.

Prompt 174: Revenue Goal Reverse Engineering

I want to hit \$[TARGET]/month in revenue.

My product: [DESCRIPTION]

Price: \$[PRICE]

Current customers: [NUMBER]

Current conversion rate: [PERCENTAGE or "unknown"]

Current traffic: [MONTHLY VISITORS or "unknown"]

Reverse engineer the path:

1. How many customers do I need at my current price?
2. How much traffic do I need at my current conversion rate?
3. What conversion rate would I need at my current traffic?
4. What price would I need at my current customer count?

Then suggest the most realistic combination:

– "If you increase traffic by [X]%, raise prices by [X]%, and improve conversion by [X]%, you'll hit your target."

Include 3 specific actions for each lever (traffic, conversion, pricing) with expected impact.

Prompt 175: Annual Plan Conversion

Help me convert more monthly subscribers to annual plans.

Monthly price: \$[PRICE]/month

Annual price: \$[PRICE]/year (current discount: [%])

Current annual plan adoption rate: [PERCENTAGE]

Design:

1. Optimal annual discount: What % discount maximizes revenue? (not signups – revenue)
2. Incentive beyond discount: What bonus can I add to the annual plan? (extra features, priority support, exclusive content)
3. Upgrade prompt timing: When should I ask monthly users to switch? (after what milestone or timeframe?)
4. Upgrade email sequence: 3 emails that convince monthly users to switch to annual
5. Checkout page design: How to present monthly vs. annual to bias toward annual

Calculate: If I move [X]% of monthly users to annual, my revenue changes by \$[CALCULATE] and my churn reduces because annual users are stickier.

Launch Strategy Prompts (176-185)

Prompt 176: Product Hunt Launch Plan

Create a Product Hunt launch plan for [PRODUCT].

Product: [DESCRIPTION]

Category: [PH CATEGORY]

Launch date: [DATE – should be Tuesday–Thursday]

Pre-launch (2 weeks before):

1. What to prepare: tagline, description, screenshots, demo video, first comment
2. Who to email for support: list of [NUMBER] contacts who will upvote day-of
3. Maker profile optimization: what to update
4. Teaser content for Twitter/LinkedIn

Launch day (hour by hour):

1. What time to launch (12:01 AM PT for maximum runway)
2. First comment template (the "maker story" that gets upvoted)
3. Outreach messages to send (email and DM templates – NOT asking for upvotes directly, which violates PH rules)
4. Social media posts for morning, midday, and evening
5. How to engage with comments on the PH page

Post-launch (week 1):

1. Follow-up with everyone who commented
2. Blog post about the launch results
3. Retarget PH visitors who didn't sign up

Metric targets: Top [5/10/20] of the day, [NUMBER] upvotes, [NUMBER] signups.

Prompt 177: Launch Email Sequence

Write a 5-email launch sequence for [PRODUCT] launching on [DATE].

Email 1 (7 days before): Tease – "Something's coming"

Email 2 (3 days before): Reveal – what it is, who it's for, early bird pricing

Email 3 (Launch day): It's live – link, social proof, urgency

Email 4 (Day 3): Proof – customer results, testimonials, demo

Email 5 (Last day): Final call – price going up / bonus expiring

For each email:

- Subject line (A/B test: write 2 options)
- Preview text
- Full email body (under 200 words each)
- CTA button text
- P.S. line

My product: [DESCRIPTION]

Price: [LAUNCH PRICE] → [REGULAR PRICE]

Target audience: [WHO]

Prompt 178: Beta Launch Strategy

Design a beta launch strategy for [PRODUCT].

Goals of the beta:

1. Validate [SPECIFIC HYPOTHESIS]
2. Find bugs before public launch
3. Generate testimonials and case studies
4. Build a waitlist for public launch

Beta structure:

- How many beta users: [NUMBER]
- Beta duration: [WEEKS]
- Beta pricing: [FREE / DISCOUNTED / FULL PRICE WITH PERKS]
- Feedback mechanism: How beta users report issues and give feedback

Create:

1. Beta application form (5 questions to qualify beta users)
2. Beta acceptance email
3. Beta user onboarding guide

4. Weekly check-in email template
5. Beta-to-launch transition email ("Beta is ending, here's your special offer")
6. Testimonial request template (sent at the end of beta)

Prompt 179: Referral Program Design

Design a referral program for [PRODUCT].

Product: [DESCRIPTION]

Price: \$[PRICE]

Current customers: [NUMBER]

Average LTV: \$[AMOUNT]

Design the program:

1. Referral reward: What does the referrer get? (account credit, cash, free month, exclusive feature)
2. Referee reward: What does the new user get? (discount, extended trial, bonus)
3. Mechanic: How does it work technically? (unique link, code, email invite)
4. Viral coefficient target: Each user should refer [X] new users
5. Anti-gaming measures: How to prevent abuse

Create:

- The referral page copy (headline, description, CTA)
- The sharing message (what users send to friends – email, tweet, text)
- The in-app prompt (when and how to ask users to refer)
- 3 email nudges to drive referral participation

Calculate: If [X]% of users refer [Y] people at a [Z]% conversion rate, I get [NUMBER] new customers/month from referrals alone.

Prompt 180: Waitlist Strategy

Design a pre-launch waitlist strategy for [PRODUCT].

Product: [DESCRIPTION]

Expected launch: [DATE]

Waitlist goal: [NUMBER OF SIGNUPS]

Create:

1. Waitlist landing page copy:
 - Headline (problem-focused, not product-focused)
 - Subheadline (the transformation)
 - 3 bullet points of what they'll get
 - Email capture form
 - Social proof element (if applicable)
2. Waitlist confirmation email:

- What they've signed up for
- What happens next
- How to move up the list (referral mechanic – invite 3 friends to jump the line)

3. Waitlist nurture sequence (one email per week):

- Week 1: Behind-the-scenes of building the product
- Week 2: Preview of a key feature
- Week 3: Social proof / early results
- Week 4: "Launch is next week" – set expectations

4. Launch day email to waitlist (they get first access, special price)

Referral mechanic: Each waitlist member gets a unique link. For every 3 friends who join, they unlock [BONUS].

Prompt 181: Soft Launch Checklist

Create a soft launch checklist for [PRODUCT].

A soft launch is: making the product available without a big announcement, to iron out issues before the full launch.

Pre-soft-launch:

- [] Core feature works end-to-end (test with 5 scenarios)
- [] Payment flow works (test with Stripe test cards)
- [] Email notifications work (signup, purchase, password reset)
- [] Mobile responsive (test on iPhone and Android)
- [] Error handling (what happens when things break – graceful errors, not white screens)
- [] Analytics tracking (what events am I tracking, confirm they fire)
- [] Legal: Privacy policy and Terms of Service pages exist
- [] Support channel set up (email or chat)

Soft launch (Days 1–7):

- [] Invite [NUMBER] hand-picked users
- [] Monitor error logs daily
- [] Respond to all feedback within [HOURS]
- [] Document all bugs and prioritize fixes
- [] Track: signups, activation rate, retention at Day 1/3/7

Go/No-Go for full launch:

- Activation rate above [%]
- No critical bugs unresolved
- [NUMBER]+ positive testimonials collected
- Payment flow has processed [NUMBER]+ real transactions

Prompt 182: Launch Metrics Dashboard

Define the metrics I should track for the launch of [PRODUCT].

Pre-launch metrics:

1. Waitlist signups (daily and cumulative)
2. Email open rate on pre-launch emails
3. Social media mentions/engagement
4. Press/blog coverage secured

Launch week metrics:

1. Signups (hourly on Day 1, then daily)
2. Activation rate (% who complete [KEY ACTION] within [TIMEFRAME])
3. Conversion rate (free to paid)
4. Revenue (daily)
5. Traffic sources (where are signups coming from?)
6. Support tickets (volume and common issues)

Post-launch metrics (Week 2-4):

1. Retention: Day 1, Day 7, Day 30
2. NPS (Net Promoter Score) or CSAT
3. Churn rate (for subscription products)
4. CAC (if running paid acquisition)
5. LTV:CAC ratio

For each metric, provide:

- How to measure it (tool/method)
- What "good" looks like (benchmark)
- What "bad" looks like (when to worry)
- Action to take if it's below target

Prompt 183: Cross-Promotion Launch

Design a cross-promotion strategy to launch [MY PRODUCT] by partnering with [NUMBER] complementary products/creators.

My product: [DESCRIPTION]

My audience: [SIZE AND NICHE]

Their product/audience: [DESCRIBE IDEAL PARTNER]

For each partner:

1. What I'm proposing: [CROSS-PROMOTION FORMAT – email swap, social media shoutout, bundle deal, affiliate]
2. What they get: [SPECIFIC BENEFIT – commission, exposure, reciprocal promotion]
3. Timeline: [WHEN THIS HAPPENS]

Create:

- The outreach email to potential partners (under 120 words)
- The co-promotion content (social post, email blurb, or landing page section)
- The tracking mechanism (unique links, codes, UTM parameters)

- The follow-up email after the promotion ends (share results, propose next collaboration)

Target: [NUMBER] signups from cross-promotions.

Prompt 184: Viral Loop Design

Design a viral loop for [PRODUCT].

A viral loop is: a mechanism where using the product naturally leads to inviting others.

Examples of viral loops:

- Dropbox: "Invite friends, get free storage"
- Calendly: "Every meeting invite shows the product"
- Loom: "Every video shared shows a Loom watermark"

My product: [DESCRIPTION]

The core action: [WHAT USERS DO IN THE PRODUCT]

Design:

1. The trigger: What natural behavior leads to sharing?
2. The share mechanism: How does the product get exposed to non-users?
3. The incentive: What motivates users to share? (intrinsic or extrinsic)
4. The conversion: How do non-users become users after seeing the product?
5. The loop: How does the new user repeat the cycle?

Calculate:

- If each user shares with [X] people, and [Y]% convert, and each new user shares with [X] people...
- Viral coefficient (K-factor): If $K > 1$, the product grows on its own
- What K-factor is realistic for my product?

Prompt 185: Launch Retrospective

I just launched [PRODUCT] [TIMEFRAME] ago. Help me do a launch retrospective.

Launch results:

- Signups: [NUMBER]
- Revenue: \$[AMOUNT]
- Traffic: [NUMBER] visitors
- Conversion rate: [%]
- Top traffic source: [SOURCE]
- Support tickets: [NUMBER]
- Biggest complaint: [ISSUE]
- Biggest compliment: [PRAISE]

Analyze:

1. What went well? (2–3 things to repeat)
2. What went wrong? (2–3 things to fix)
3. What surprised me? (unexpected outcomes)
4. What would I do differently?
5. What's the #1 priority for the next 30 days?

Then create a 30-day post-launch action plan with specific weekly milestones:

Week 1: [FOCUS]

Week 2: [FOCUS]

Week 3: [FOCUS]

Week 4: [FOCUS]

Growth & Operations Prompts (186-200)

Prompt 186: Growth Experiment Backlog

Generate 15 growth experiments for [PRODUCT/SERVICE].

Current state:

- Monthly traffic: [NUMBER]
- Conversion rate: [%]
- Revenue: \$[AMOUNT]
- Main acquisition channel: [CHANNEL]

For each experiment:

1. Hypothesis: "If we [ACTION], then [METRIC] will [CHANGE] because [REASON]"
2. Test: How to run the experiment (specific steps)
3. Duration: How long to run it
4. Success metric: What number tells us it worked
5. Effort: LOW / MEDIUM / HIGH
6. Impact: LOW / MEDIUM / HIGH

Prioritize using ICE scoring: Impact (1–10) x Confidence (1–10) x Ease (1–10)

Sort by ICE score, highest first.

Categories to cover: acquisition, activation, retention, revenue, referral (AARRR framework).

Prompt 187: Churn Reduction Plan

Create a churn reduction plan for [PRODUCT].

Current monthly churn rate: [%]

Average customer lifetime: [MONTHS]

Top reasons customers cancel: [LIST IF KNOWN, or "unknown – help me figure it out"]

Price: \$[PRICE]

Address churn at every stage:

1. Onboarding churn (first 7 days):
 - How to identify at-risk users
 - Intervention emails/in-app messages
 - Onboarding checklist design
2. Engagement churn (month 1-3):
 - Usage patterns that predict churn
 - Re-engagement campaigns
 - Feature discovery prompts
3. Value churn (month 3+):
 - How to demonstrate ongoing value
 - Upsell to deeper engagement
 - Community building
4. Cancellation flow:
 - Off-ramp offers (pause, downgrade, discount)
 - Exit survey (3 questions max)
 - Win-back email sequence (30, 60, 90 days after cancel)

Target: Reduce churn from [CURRENT]% to [TARGET]%.

Prompt 188: SOPs for Solo Operators

Create Standard Operating Procedures for my one-person business.

My business: [DESCRIPTION]

Things I do weekly:

1. [TASK 1]
2. [TASK 2]
3. [TASK 3]
4. [TASK 4]
5. [TASK 5]

For each task, create an SOP:

- Trigger: What initiates this task?
- Steps: Numbered steps with specific actions (a new hire could follow these)
- Tools: What tools/accounts are needed
- Time estimate: How long it should take
- Automation potential: Can any steps be automated? (with specific tool recommendations)
- Delegation potential: Can this be outsourced? (estimated cost on Upwork/Fiverr)

Goal: Document everything so that if I can't work for 2 weeks, someone else could keep the business running.

Prompt 189: Automation Audit

Audit my workflow for automation opportunities.

My daily/weekly tasks:

1. [TASK 1] – [TIME SPENT] – [TOOL USED]
 2. [TASK 2] – [TIME SPENT] – [TOOL USED]
 3. [TASK 3] – [TIME SPENT] – [TOOL USED]
 4. [TASK 4] – [TIME SPENT] – [TOOL USED]
 5. [TASK 5] – [TIME SPENT] – [TOOL USED]
- [ADD MORE]

For each task:

1. Can it be fully automated? (YES = set it up and forget it)
2. Can it be partially automated? (SEMI = reduces time by X%)
3. Must it stay manual? (NO = but maybe optimize the process)

For automatable tasks:

- Recommended tool (Zapier, Make, n8n, custom script, cron job)
- Setup time (hours)
- Monthly cost
- Time saved per month
- ROI: (time saved x hourly rate) / monthly cost

Rank automations by ROI. Create a "Top 5 Automations to Set Up This Weekend" action list.

Prompt 190: Hiring Decision Framework

Should I hire for [ROLE] in my business?

Context:

- My current revenue: \$[AMOUNT]/month
- Time I spend on tasks this person would do: [HOURS/WEEK]
- My effective hourly rate: \$[AMOUNT]
- Cost of the hire: \$[AMOUNT/MONTH] (salary, contractor rate, or freelancer)

Analyze:

1. Opportunity cost: What could I do with [X] hours/week freed up? What's the revenue potential?
2. Break-even: How much additional revenue does the hire need to generate to pay for themselves?
3. Risk: What if revenue drops – can I still afford them?
4. Alternative: Could a tool or automation handle 80% of this work for 10% of the cost?

Decision matrix:

- HIRE if: [CONDITIONS]
- WAIT if: [CONDITIONS]
- AUTOMATE INSTEAD if: [CONDITIONS]

If HIRE: Write the job description, specify where to post (Upwork, Twitter, niche job board), and list the top 5 interview questions.

Prompt 191: Weekly Review Template

Create a weekly review template for my [TYPE] business.

Sections:

1. Numbers check (5 min):
 - Revenue this week: \$___
 - New customers: ___
 - Churn: ___
 - Traffic: ___
 - Conversion rate: ___
2. Win of the week (2 min):
 - What went right?
 - Why did it work?
 - How do I repeat it?
3. Problem of the week (3 min):
 - What didn't work?
 - Root cause?
 - Fix: ___
4. Customer feedback (3 min):
 - What are customers saying?
 - Any patterns?
 - Action to take: ___
5. Next week's focus (5 min):
 - #1 priority: ___
 - #2 priority: ___
 - #3 priority: ___
 - What I'm NOT doing (explicitly): ___
6. 30-day outlook:
 - Am I on track for my monthly goal?
 - If not, what needs to change?

Total time: 20 minutes. No fluff. Numbers and decisions only.

Prompt 192: Customer Segmentation

Help me segment my customer base for [PRODUCT].

What I know about my customers:

- Total customers: [NUMBER]
- Price points they're on: [LIST TIERS]
- Usage patterns: [WHAT DATA I HAVE – features used, frequency, etc.]

- Acquisition channel: [WHERE THEY CAME FROM]
- Industry/role: [IF KNOWN]

Create segments based on:

1. Value (high-value vs. low-value customers)
2. Behavior (power users vs. casual users vs. inactive)
3. Need (which problem they're solving with my product)

For each segment:

- Name it (something memorable, not "Segment A")
- Size (% of customer base)
- Revenue contribution (% of total revenue)
- Churn risk (LOW / MEDIUM / HIGH)
- Growth potential (can I get more from this segment?)
- Tailored strategy (how to serve, retain, and grow this segment)

Then: Which segment should I focus on for growth, and which should I stop investing in?

Prompt 193: Partnership Proposal Template

Write a partnership proposal document for [PARTNER COMPANY].

Sections:

1. Executive summary (what I'm proposing, 3 sentences)
2. About my company (relevant background, audience, metrics)
3. Partnership opportunity (specific proposal with deliverables)
4. Mutual benefits (what they get, what I get – with projected numbers)
5. Timeline and milestones
6. Revenue/cost sharing (if applicable)
7. Success metrics (how we'll know if this is working)
8. Next steps (specific ask – meeting, pilot, trial)

Context:

- My business: [DESCRIPTION]
- Their business: [DESCRIPTION]
- Partnership idea: [WHAT I'M PROPOSING]
- Why this benefits them: [SPECIFIC REASONS]

Keep it to 2 pages. Professional but not corporate. Include specific numbers wherever possible.

Prompt 194: Crisis Communication Plan

Create a crisis communication plan for [MY BUSINESS].

Potential crises to plan for:

1. Product goes down for 4+ hours
2. Data breach or security incident
3. Negative viral social media post about my product

4. Major bug that affects paying customers
5. Co-founder/key employee departure (if applicable)

For each crisis:

1. Detection: How will I know this is happening?
2. Assessment: How do I evaluate severity? (CRITICAL / HIGH / MEDIUM)
3. Response timeline: Within [MINUTES/HOURS]
4. Internal actions: What to fix and in what order
5. External communication: Email template, social media post, status page update
6. Post-crisis: Follow-up email, incident report, preventive measures

Write the actual templates (not just descriptions) for the status page update and customer email for scenarios 1 and 4.

Prompt 195: Annual Planning

Help me create an annual plan for my [BUSINESS TYPE].

Last year results:

- Revenue: \$[AMOUNT]
- Customers: [NUMBER]
- Key wins: [LIST]
- Key failures: [LIST]

This year goals:

- Revenue target: \$[AMOUNT]
- Customer target: [NUMBER]
- New initiative: [WHAT I WANT TO LAUNCH OR CHANGE]

Create a quarterly breakdown:

Q1: Foundation

- Key objective: ____
- 3 measurable goals
- Major project: ____

Q2: Growth

- Key objective: ____
- 3 measurable goals
- Major project: ____

Q3: Scale

- Key objective: ____
- 3 measurable goals
- Major project: ____

Q4: Optimize

- Key objective: ____
- 3 measurable goals
- Major project: ____

Include monthly revenue milestones and what needs to be true at each checkpoint.

If I'm off track in Q2, what's the contingency plan?

Prompt 196: Email Funnel Design

Design a complete email marketing funnel for [PRODUCT/SERVICE].

Top of funnel – lead magnet:

- What free resource to offer: [SUGGEST BASED ON MY NICHE: [NICHE]]
- Landing page headline
- Opt-in form copy

Middle of funnel – nurture sequence (7 emails over 14 days):

- Email 1: Welcome + deliver lead magnet + set expectations
- Email 2: Problem awareness (agitate the pain)
- Email 3: Solution education (how to solve it – teach, don't sell)
- Email 4: Social proof (case study or testimonial)
- Email 5: Objection handling (address the top 3 objections)
- Email 6: Soft pitch (introduce the product naturally)
- Email 7: Hard pitch (direct CTA, urgency, guarantee)

Bottom of funnel – post-purchase:

- Thank you email
- Onboarding email (get them started)
- Check-in email (Day 7 – are they getting value?)
- Upsell email (Day 30 – next product)
- Review/testimonial request (Day 45)

For each email: subject line, preview text, body (under 200 words), CTA.

Prompt 197: Content Monetization Strategy

Help me monetize my content about [TOPIC].

My content:

- Platform(s): [WHERE I PUBLISH]
- Audience size: [NUMBER]
- Posting frequency: [HOW OFTEN]
- Engagement rate: [IF KNOWN]
- Current revenue from content: \$[AMOUNT]

Monetization options to evaluate:

1. Paid newsletter (Substack, Beehiiv)
2. Digital products (courses, templates, ebooks)
3. Sponsorships (who would pay to reach my audience?)
4. Affiliate marketing (what products does my audience already buy?)
5. Community (paid Slack/Discord/Circle)
6. Consulting/coaching (leveraging content expertise)
7. Ad revenue (YouTube, podcast ads)

For each option:

- Revenue potential based on my audience size
- Effort to implement
- How it affects my content (does monetization make content worse?)
- Recommended pricing
- First step to test it

Rank by: revenue-to-effort ratio. Which should I start with this month?

Prompt 198: Decision Framework

Help me make a decision about [DECISION].

Option A: [DESCRIBE]

Option B: [DESCRIBE]

Option C: [DESCRIBE] (if applicable)

Evaluate each option on:

1. Upside potential (best case scenario)
2. Downside risk (worst case scenario)
3. Reversibility (can I undo this if it doesn't work?)
4. Time cost (how much time does this take?)
5. Opportunity cost (what can't I do if I choose this?)
6. Alignment (does this move me toward my [GOAL]?)

For each option, calculate an expected value:

$(\text{Probability of success} \times \text{Upside}) - (\text{Probability of failure} \times \text{Downside}) = \text{Expected Value}$

Give me a clear recommendation with reasoning. Don't say "it depends"
- take a stance based on the information provided. If critical information is missing, tell me what I need to find out before deciding.

Prompt 199: Quarterly Business Review

Conduct a quarterly business review based on these numbers:

Revenue: \$[AMOUNT] (target was \$[TARGET])

Customers: [NUMBER] (target was [TARGET])

Churn: [%] (target was [TARGET]%)

Traffic: [NUMBER] (target was [TARGET])

Conversion rate: [%] (target was [TARGET]%)

Biggest expense: \$[AMOUNT] on [WHAT]

Most successful channel: [CHANNEL]

Least successful effort: [WHAT]

Analyze:

1. Are we on track for the annual goal? Show the math.

2. What's working? (double down)
3. What's not working? (cut or fix)
4. What changed this quarter vs. last? (trends)
5. Resource allocation: Am I spending time/money on the right things?

Create next quarter's plan:

- #1 revenue priority
- #1 growth priority
- #1 efficiency priority
- One thing to stop doing
- One new experiment to try

Prompt 200: Exit Strategy Planning

Help me think through exit strategies for [MY BUSINESS].

Business details:

- Revenue: \$[AMOUNT]/month
- Profit margin: [%]
- Growth rate: [% MoM or YoY]
- Customer count: [NUMBER]
- Churn rate: [%]
- Team size: [NUMBER]
- Years in operation: [NUMBER]
- Key dependencies: [WHAT THE BUSINESS CAN'T RUN WITHOUT]

Exit options:

1. Acqui-hire: What companies might buy me for the team/technology?
2. Strategic acquisition: Who would buy this to add to their product suite?
3. Financial acquisition: What's the business worth to a financial buyer? (typical SaaS multiples)
4. Marketplace sale: List on MicroAcquire/Acquire.com/Flippa – realistic price range?
5. Lifestyle business: Keep running it with minimal effort – what would that look like?

For each option:

- Realistic valuation range (show the math)
- Timeline to execute
- What I need to improve to maximize value
- Who specifically to approach

Which option maximizes value given my current numbers? What should I focus on for the next 6 months to increase my exit multiple?
